REPORT ON OPERATIONS AND FINANCIAL STATEMENTS 2019

REPORT ON OPERATIONS

1 ILMARINEN IN BRIEF IN 2019

2019 was an excellent year for Ilmarinen. The customer base grew, costs decreased, cost-effectiveness improved and pension processing times declined. Thanks to strong investment returns, Ilmarinen's total result grew to EUR 2,039.7 million (–1,581.0).

The development of both the equity and fixed income markets was favourable. Ilmarinen's return on investments for 2019 rose to 11.8 (–1.4) per cent. Investment assets grew to EUR 51 (46) billion, and the solvency ratio strengthened to 126.6 (123.7) per cent.

Ilmarinen's premiums written increased to EUR 5,758.3 (5,409.9) million and pensions paid to EUR 6,077.8 (5,698.4) million. Measured in premiums written, net customer acquisition was EUR 204 (262) million. The customer acquisition in the comparison year 2018 was increased by EUR 121 million by the OP-Eläkekassa portfolio transfer. A total of 8,509 (5,740) new TyEL insurance policies and 9,356 (9,097) YEL insurance policies were sold. Due to transfers, the company's premiums written increased by EUR 15.5 million.

Loading income grew to EUR 184.7 (178.7) million and the operating expenses covered by it declined to EUR 130.2 (148.8) million. The loading profit grew significantly to EUR 54.5 (29.9) million and the ratio of operating expenses to expense loading components correspondingly improved to EUR 70.5 (83.2) per cent. The operating expenses in the comparison year 2018 were burdened by EUR 15.3 million in expenses from the write-downs of duplicative systems.

The company's strategy and management system were renewed during the year. The organisational structure was renewed in summer and new core processes and a new development model that supports customer-driven business development were established for the company.

The Incomes Register was taken successfully into use and integration work has proceeded as planned. However, development work on the basic systems must be continued in 2020. Despite the busy start to the year, with the introduction of the Incomes Register and the integration process, and the changes taking place in the organisation, personnel's work energy remained excellent. Efforts to establish operating practices and improve daily work will continue.

The key figures describing Ilmarinen's operations are presented below. The figures presented in the Report on Operations are the parent company's figures, unless otherwise stated.

	2019	2018	2017	2016	2015
Insurance contributions, EUR million	5,758.3	5,409.9	4,311.6	4,301.8	4,268.7

Permanent personnel 31 Dec	616	649	520	540	542

1) Due to the change in premium rates affecting the expense loading component, the ratio of operating expenses to expense loading components for 2015–2016 is not comparable with the figures of previous years. In addition, Ilmarinen and Etera merged in the beginning of 2018; the comparison data for 2015–2017 only includes Ilmarinen's figures.

2) Calculated according to the regulations in force at any given time.

3) Technical provisions + solvency capital in accordance with section 11, item 10, of the Ministry of Social Affairs and Health's decree (614/2008.) Until 2016, technical provisions + valuation differences.

4) Insurance policies of employers with insurance contracts

Ilmarinen and Etera merged in the beginning of 2018. The figures for 2015–2017 do not include Etera's figures.

2 ILMARINEN'S STRATEGY

Ilmarinen's updated strategy was adopted in April. The strategy update was prepared jointly with the Board of Directors, company management and, to a large extent, the entire personnel. Ilmarinen's basic task is to take care of the earnings-related pension cover of its customers. The company's vision is to be the most attractive working life partner – responsibly, for you. The long-term goals set in the strategy were to be one of Finland's best places to work, offer the best customer experience in the sector and grow profitably and faster than the market. In terms of the ratio of operating expenses to expense loading components and solvency, the goal is to be better than the sector average.

To reach these goals, the strategy defines five focal areas: we will succeed together and reinvent ourselves courageously, we will operate with a focus on customers and promote work ability, grow profitably together with our customers, digitalise customer paths and processes and invest profitably, securely and responsibly. Ilmarinen's values remained unchanged and they guide the work towards the goals: openly and responsibly and achieve success through teamwork.

3 ECONOMIC DEVELOPMENT

Global economic growth slowed down to around three per cent in 2019 from close to four per cent in 2018. The year was marked by uncertainty over the trade relations between the USA and China, which depressed global trade volumes and the economic outlook. Due to the uncertain outlook, the central banks started to lighten their monetary policies again. In the USA, the central bank cut its key interest rate three times. The ECB kept its key interest rate at zero and restarted its bond purchase programme. Supported by a lighter monetary policy, the global financing markets showed favourable development: interest rates declined and stock prices rose.

Finland's total production is estimated to have grown by some 1.5 per cent in 2019, on a par with the previous year. The rise of the economy also impacted employment, improving it significantly. The unemployment rate declined by almost one percentage point to 6.7 per cent and the average employment rate rose to 72.6 per cent. These changes also impacted the development of payroll. The payroll for the whole economy grew by some 4 per cent during the year and the private sector TyEL payroll grew by around 6.6 per cent. The average earnings level growth rate was close to 3 per cent. Consumer prices rose 1.0 per cent and average real earnings thus rose by approximately two per cent.

The effects of the positive economic development could also be seen in public finances, the balance of which remained more or less intact compared to the previous year. Public indebtedness in relation to total production did not grow, and the debt of public corporations in relation to total production remained at around 59 per cent.

Towards year-end, expectations of economic development turned towards slightly slower growth. The cycle was, however, expected to remain positive, supported by a light monetary policy. Stock prices continued to rise during the final quarter of the year, with interest rates remaining low. Real estate and other real investment markets continued to strengthen during the year.

4 DEVELOPMENTS IN THE EARNINGS-RELATED PENSION SYSTEM

The national Incomes Register was introduced in Finland in early 2019. As of the start of the year, employees' earnings data, which is essential for the calculation of pensions and pension insurance contributions, was available through the Incomes Register almost in real time. Before, this information was received separately from each employer with a longer delay. The introduction of the Incomes Register in the tax administration was challenging, but the information flow and timeliness changed during 2019. A decision was made by way of legislation to defer the reporting of pension data to the Incomes Register by one year. Pension data will be reported to the Incomes Register as of 1 January 2021.

The age limit for old-age pensions continued to rise. The lower age limit for those born in 1956 was 63 years and 6 months. The retirement age rises by age group until the lower age limit is 65 years. The long period of decline in disability pensions came to a halt in 2018 and the rise in the number of disability pension applications continued in 2019. According to a survey carried out by the Finnish Centre for Pensions, an increase could be seen especially in the applications submitted by unemployed persons.

The working group tasked with the development of the self-employed person's pension insurance proposed, among other things, closer monitoring of self-employed persons' earned income and new methods to make it easier to assess the income.

During the year, the working group tasked with looking into the division into two separate pension systems also gave its proposal. The working group unanimously stated that it would be possible and appropriate to join together the municipal and the private sector pension systems. The Ministry of Social Affairs and Health has already started preparing the legislation for combining the systems. Since the change will be a major one, preparations are being made with a view to combining the systems no earlier than in 2027.

Labour market organisations agreed on renewing the survivors' pension such that the surviving spouse's pension shall also concern common-law spouses who have lived

together for at least 5 years and have a child together. At the same time, survivors' pension will be changed into a fixed-term benefit (10 years). The changes are being prepared and, according to the plans, the changes will apply to those born in or after 1975. The age until which a child's pension is paid will rise to 20 years.

According to the government programme, the Finnish government is improving small pensions. Implemented through the national pension and guaranteed minimum pension system, the changes entered into force on 1 January 2020. In a bid to enhance employment possibilities for those with partial work ability, a so-called linear model has been planned, which would encourage working alongside a partial disability pension.

The earnings-related pension system is under pressure to change; especially the dramatic decline in the birth rate and the population projection updated based on it have changed the long-term outlook for pension financing. An exceptionally large number of extensive studies are underway to serve as a basis for developing the pension system. These studies are related to, for example, vocational rehabilitation and the renewal of solvency regulations to enable better long-term investment returns.

In October 2019, the Financial Supervisory Authority published a supervised entity release addressed to all earnings-related pension companies, accompanied by a memorandum which specifies the guidelines concerning the management of disability risk and further restricts the operations of earnings-related pension companies. In the supervised entity release, the Financial Supervisory Authority states that "the management of disability risk is an activity that is permitted for earnings-related pension companies, but only as risk management that is included in the underwriting business and which reduces the disability risk under the company's own responsibility." The specified guidelines stipulate, among other things, that an earnings-related pension company's disability risk management activities must be "educative in nature", and that the company's own personnel costs, according to the Financial Supervisory Authority's interpretation, "must not be substantial in relation to the disability risk administrative cost component". In spring 2019, a provision concerning activities to manage disability risk was added to the Keva Act. Such provision is not included in the act concerning private-sector pension providers.

5 ILMARINEN'S RESULT AND SOLVENCY

Ilmarinen's total financial result in 2019 at current value stood at EUR 2,039.7 (–1,581.0) million. The result consists of the investment result, the underwriting result and the loading profit.

The annual return on the company's investments was 11.8 (–1.4) per cent and real return 10.9 (–2.6) per cent. Net investment return at current value was EUR 5,375.4 (–641.6) million. Investment income at current value was EUR 2,062.6 (–1,592.1) million, when taking into account the interest credited on technical provisions, EUR 1,508.7 (1,545.7) million, and the equity-linked return requirement was EUR 1,804.1 (–595.2) million.

The underwriting result under the company's own responsibility was EUR –50.3 (–40.5) million. The underwriting result is the difference between contribution components intended to cover insurance risks and claims incurred. The negative underwriting result is mainly attributable to the negative result of the disability pension business. The level of the contribution intended to cover disability risk was lowered by 0.1 percentage points to 0.9 percentage points for 2019. However, the number of disability pensions had already started to grow again in 2018 at Ilmarinen and in the whole sector. Therefore, the

tariff has been increased back to 1.0 per cent for 2020, which will improve the underwriting result. With the increasing incidence of disability pensions, activities to prevent disability pensions have gained even more importance.

The loading profit shows the amount by which the expense loading components and other similar income exceed the operating expenses to be covered by them. Ilmarinen's loading profit rose to EUR 54.5 (29.9) million. Loading income grew to EUR 184.7 (178.7) million and the corresponding operating expenses declined to EUR 130.2 (148.8) million.

Solvency capital, i.e. the difference between the company's assets and liabilities measured at current value, was EUR 10,791.8 (8,917.7) million. The solvency ratio was 126.6 (123.7) per cent at the end of 2019. The solvency capital is intended to cover the risks inherent in insurance and investment operations. The solvency capital at the end of the financial period was 1.6 (1.6) times the solvency limit required by the risk allocation of the company's investments.

The amount allocated for discounts on TyEL insurance contributions, i.e. client bonuses, is determined based on the company's solvency capital and loading profit. For 2019, EUR 164 (120) million will be allocated for client bonuses. This is 0.7 (0.6) per cent of the insured payroll.

The above information concerning the result and solvency is based on the key figures calculated at current value presented in the notes to the financial statements. It shows the company's financial result and position more clearly than the profit and loss account and balance sheet. The valuation of investments in accounting is based on the lower of cost or current value and the amount of profit in the profit and loss account is determined by the calculation base approved in advance by the Ministry of Social Affairs and Health. The difference between the book profit and the result in the profit and loss account is entered as technical provisions, excluding the change in depreciation difference. In 2019, the profit in the profit and loss account was EUR 8.9 (6.0) million.

The following calculation shows the connection of the result in the profit and loss account to the total financial result at current value:

€M	2019	2018
Result in the profit and loss account	8.9	6.0
Change in provision for future bonuses	-1,466.5	-543.0
Transfer to client bonuses	164.0	120.0
Change in depreciation difference	-0.3	-0.2
Change in difference between current and book values	3,333.6	-1,163.8
Profit at current value	2,039.7	-1,581.0

6 INSURANCE PORTFOLIO AND PREMIUMS WRITTEN

The majority of employers that have insured their employees with Ilmarinen have signed an insurance contract with the company. Employers only employing temporary employees can, however, pay their employer contributions to a pension insurance company without signing an actual insurance contract.

The introduction of the Incomes Register meant that insurance services for employers and Ilmarinen's insurance processes are now much more up to date than before. After the initial hurdles, the Incomes Register's operations have got off to a good start.

At the end of 2019, the number of valid TyEL insurance policies amounted to 70,491 (73,370) and, in addition to employers with insurance contracts with Ilmarinen, 15,728 (21,039) temporary employers paid TyEL contributions to the company. At the end of the year, the TyEL payroll insured with Ilmarinen was EUR 21,923 (20,568) million, and 609,862 (624,800) insured were covered by the company's TyEL insurance policies. The number of YEL insurance policies at year-end was 76,063 (74,443) and the annual reported income for YEL insurance policies totalled EUR 1,678 (1,682) million.

In 2019, Ilmarinen's premiums written stood at EUR 5,758.3 (5,409.9) million. TyEL insurance contributions amounted to EUR 5,364.5 (5,025.6) million, and client bonuses granted as discounts in TyEL contributions totalled EUR 119.7 (136.4) million. The YEL insurance premiums written were EUR 393.8 (384.3) million.

Credit losses on unpaid TyEL insurance contributions amounted to EUR 13.2 (15.6) million, accounting for 0.3 (0.3) per cent of the premiums written. Credit losses on unpaid YEL insurance contributions were EUR -2.7 (3.4) million. However, the YEL credit losses will not result in losses for the company, as the state's share in the financing system for YEL pensions compensates for insurance contributions left unpaid by policyholders.

Insurance customers logged in to Ilmarinen's online service 806,416 (813,917) times and their matters were also handled through 108,957 (133,248) phone calls as well via chat, email, face-to-face meetings and letters.

One portfolio transfer from Ilmarinen to Telia's pension fund took place at the end of 2019. These policies represent a total of EUR 24.7 million in assets. The amount consists of a total of EUR 19.9 million in technical provisions for TyEL insurance cover and of EUR 4.8 million in solvency capital (24.3% of technical provisions).

7 CONTRIBUTION LEVEL

The average TyEL contribution for 2019 was 24.4 (24.4) per cent of an employee's salary or wages, i.e. the same as in the previous year. In accordance with the competitiveness pact agreed on by labour market organisations in 2016, the employees' share of the contribution rose 0.4 (0.2) percentage points and that of employers declined correspondingly. The contribution for employees aged under 53 and employees having reached the age of 63 was thus 6.75 (6.35) per cent, and 8.25 (7.85) per cent for those aged between 53 and 62. The average contribution for employers was 17.35 (17.75) per cent of the payroll. The employer contribution level varies depending on the insurance policy as well as the client bonuses paid by the pension insurance company. When determining the average contribution level, the average client bonus has been estimated at 0.6 per cent of the employer's payroll.

The table below presents the amount of client bonuses (EUR 120 million) paid by Ilmarinen in 2019 in relation to the payroll by customer segment. The segments are ones which, according to the guidelines of the Ministry of Social Affairs and Health, should be used in the common reporting of pension providers. For the year 2020, the amount of client bonuses will rise to EUR 164 million, which is 0.7 (0.6) per cent of the payroll.

SEGMENT LIMITS, €M (AT 2018 LEVEL)	BONUSES/PAY-ROLL
0–0.4	0.5%
0.4–2.1	0.5%
2.1–9.9	0.6%
9.9–33.4	0.6%
33.4–	0.7%

The confirmed average TyEL contribution for 2020 is also 24.4 per cent. In accordance with the competitiveness pact, the average employer contribution will decrease further by 0.40 percentage points to 16.95 per cent of salaries and wages. Employees' contributions will rise correspondingly. In 2020, the contribution for employees aged under 53 and those aged 63 and over is 7.15 per cent, and 8.65 per cent for those aged 53–62.

The contribution for self-employed persons aged under 53 and over 62 was 24.1 per cent, and 25.6 per cent for the others. The contribution percentages will be the same in 2020.

8 PENSIONS

A total of 36,312 (33,876) new pension decisions were made at Ilmarinen in 2019, and pensions were paid in a total amount of EUR 6,077.8 (5,711.7) million.

Pensions paid by type of pension in 2019

EUR million	TyEL	YEL	Total	%
Old-age pensions	4,532.8	325.3	4,858.1	79.9
Early old-age pensions	224.7	19.5	244.2	4.0
Partial early old-age pensions	46.0	4.0	50.0	0.8
Part-time pensions	1.5	0.4	1.9	0.0
Disability pensions	473.1	26.7	499.7	8.2
Years-of-service-pensions	0.0	0.0	0.0	0.0
Survivor's pensions	394.6	29.2	423.9	7.0
Total	5,672.6	405.2	6,077.8	100.0

The company's premiums written stood at EUR 5.8 (5.4) billion. Pensions paid excluding pension management costs stood at EUR 6.1 (5.7) billion, which is approximately EUR 320 (289) million more than the premiums written.

The majority of the pension expenditure, i.e. 79.9 (79.4) per cent, consisted of old-age pensions. Disability pensions made up 8.2 (8.7) per cent of the pension expenditure and survivors' pensions 7.0 (7.2) per cent.

Number of pensioners on 31 December 2019

Pensions in accordance with basic cover

	TyEL	YEL	Total	%
Old-age pensions	311,021	33,526	344,547	75
Early old-age pensions	0	0	0	0
Partial early old-age pensions	5,390	946	6,336	1
Part-time pensions	82	26	108	0
Disability pensions	36,057	2,438	38,495	8
Survivor's pensions	63,470	6,974	70,444	15
Total	416,022	43,910	459,932	100

The number of pensioners at the end of the year was 459,932 (459,993). At the end of the year, 416,022 (418,162) pensioners received TyEL pensions and 43,910 (41,831) received YEL pensions.

Pension decisions in 2019

During 2019, altogether 68,397 (55,973) pension decisions were issued.

	2019	2018	Change %
New pension decisions			
Old-age pensions	13,972	13,396	4
Partial early old-age pensions	3,338	2,687	24
Disability pensions	9,525	8,446	13
Years-of-service pensions	19	16	19
Survivors' pensions	4,875	4,809	1
Right to rehabilitation	4,583	4,522	1
Total new pension decisions	36,312	33,876	7
Total pension decisions	68,397	55,973	22

The number of new disability pension decisions grew 13 (9) per cent. The share of customers receiving a negative disability pension decision was 33.7 (30.1) per cent. Of the negative decisions sent to the Pension Appeal Board (Työeläkeasioiden muutoksenhakulautakunta TELK), 14.2 (14.8) per cent were amended against Ilmarinen's position. The share of amended decisions was around 1.9 (2.6) percentage points higher than that of other private sector operators on average.

The number of old-age pension applications declined by some 10 per cent. The decline was impacted by the three-month rise in the lower retirement age, which is now 63 years and 6 months for those born in 1956. On the other hand, the share of old-age pension decisions increased, because the processing was changed such that an interim decision is issued to the insured immediately, based on information contained in the Incomes Register, and the final decision with all income data is issued later.

The pension application process was developed during the year, resulting in substantially shorter processing times. The average processing time for old-age pension applications in December was 13 (43) days and for disability pension applications 43 (74) days. At the same time, customer satisfaction improved.

9 DISABILITY RISK MANAGEMENT

The number of disability pension applications continued to grow at Ilmarinen in 2019, with the company receiving close to 7 per cent more new disability pension applications than in the previous year. Disability pensions granted for mental health reasons grew most, showing a year-on-year growth of approximately 20 per cent. Mental health reasons were, for the first time, the largest diagnosis group in the disability pensions granted by Ilmarinen. Growth in disability pensions granted for musculoskeletal illnesses was minor. Anticipating and managing work ability risks can support coping at work and lengthen careers. The prevention of disability benefits the employee, employer and society alike.

In activities aimed at boosting work capacity, Ilmarinen's co-operation with clients is systematic and goal-oriented and the projects are targeted at jointly identified development areas to reduce disability risks. Co-operation is based on written agreements and the results produced by the services are monitored through indicators agreed on together with clients and customer surveys, for example. The monitoring of the results shows that the services are successful in improving work capacity and reducing disability risk.

In 2019, 32 coaching sessions were organised for client companies throughout Finland to support them in work capacity management, attracting 2,200 participants. During the year, 3,000 distinct coaching or other projects to maintain work capacity were also underway in co-operation with clients.

The management of disability risks in client companies is also supported through vocational rehabilitation. This service includes training provided to supervisors and advisory services, as well as expert support for both supervisors and employees during the rehabilitation planning phase. In 2019, some 4,500 new people received a decision on support for changing careers or returning to work. During the actual rehabilitation period, the company pays benefits pursuant to earnings-related pension legislation to support the individual's income during the rehabilitation and compensate for the costs resulting from the rehabilitation. A total of approximately 9,400 different rehabilitation decisions were issued in 2019.

The disability risk administrative cost component included in the insurance contribution was EUR 6.5 (6.1) million. Of this, EUR 5.1 (5.7) million was used for managing disability risk in client companies and EUR 1.3 (0) for other operating expenses related to disability risk management.

The Financial Supervisory Authority completed the inspection concerning Ilmarinen's work ability activities in December. The inspection revealed that the company's interpretations differed from those of the supervisory authority. The Financial Supervisory Authority's demands and recommendations and the guidelines specified in the supervised entity release addressed to all earnings-related pension insurance companies will be reviewed and the detected deficiencies will be attended to. Ilmarinen will submit its response to the Financial Supervisory Authority in February 2020.

10 TECHNICAL PROVISIONS

At the end of 2019, Ilmarinen's technical provisions totalled EUR 42,150.1 (40,625.7) million. The liability for future and current pensions amounted to EUR 38,873.9 (37,725.8) and the provision for future bonuses, which buffers against insurance and investment losses, stood at EUR 1,575.0 (3,043.6) million. The equity-linked buffer stood at EUR 1,537.7 (–262.9) million.

The liability for future and current pension grows due to the pension cover accrued during the year and is reduced when pensions are paid. Interest is credited on technical provisions on return on investments in compliance with the technical bases. The majority of the return requirement on technical provisions of pension insurance companies is determined on the basis of the average solvency of pension institutions. The equity linked buffer ties 20 per cent of the technical provisions to the average return on listed equities of pension funds and thus transfers the equity risk from the company to be covered by the entire earnings-related pension system. The interest credited on technical provisions totalled 8.0 (2.5) per cent in 2020, of which the return tied to the equity linked buffer equalled 4.3 (–1.5) per cent. A 3.7 (4.0) per cent return was credited on the remaining technical provisions.

Breakdown of technical provisions

EUR million	2019	2018
Provision for unearned premiums		
Future pension	19,686.4	19,068.4
Provision for future bonuses	1,575.0	3,043.6
Provision for current bonuses	163.4	119.2
Equity linked buffer	1,537.7	-262.9
Total provision for unearned premiums	22,962.7	21,968.3
Provision for claims outstanding		
New pensions awarded	19,187.5	18,657.4
Equalisation provision	19,187.5	18,657.4
Total technical provisions	42,150.1	40,625.7

11 INVESTMENT OPERATIONS

Pension assets must be invested in a profitable and secure manner. That is why a long-term approach is essential in investing pension assets. The objective of Ilmarinen's investment operations is the highest possible return on investments in the long term. However, the average risk of the investments should not be too high in relation to the company's risk bearing ability.

In 2019, economic growth slowed down. However, the favourable economic cycle was expected to continue. Monetary policy was lightened during the year as the US central bank cut its key interest rate three times. The ECB kept its key interest rate at zero and restarted its bond purchase programme. Inflation remained moderate.

The lightening monetary policy and the US tax reliefs carried out previously raised companies' earnings and asset valuations in 2019. Equity markets rose at a brisk pace. As a result of declining long-term interest rates, long-term fixed income investments yielded good returns. The US dollar appreciated by around 3 per cent against the euro. 2019 was a good year also for real and private equity investments.

At the end of 2019, the company's total investments at current value were EUR 50,527.8 (46,024.0) million. The return on investments at current value was 11.8 (–1.4) per cent. Inflation in Finland decreased from 1.1 per cent in the previous year to 1.0 per cent. The real return on the company's investments in 2019 thus came to 10.8 (–2.6) per cent. Calculated at current value, the average annual return over the last ten years has been 5.8 per cent, which corresponds to an average annual real return of 4.4 per cent. Calculated from 1997, the average annual return at current value on the company's investments has been 5.8 per cent per annum. This corresponds to an annual real return of 4.3 per cent.

The following graph presents the current value of the company's investment assets by asset class. The notes to the financial statements include this basic allocation as well as the investment risk allocation and a table portraying the classification of investment returns according to investment class.

	2019 Basic breakdown		2019 Risk breakdown		2019 Return		Volatility
	EUR mill.	%	EUR mill.	%	%		
Fixed-income investments	17,014.6	33.7	12,917.1	25.6	4.7

Investments total	50,527.8	100.0	47,992.2	95.0	11.8	4.1	
Effect of derivatives			2,535.6	5.0			
Investments at current value	50,527.8		50,527.8	100.0			

The modified duration of bond investments is 1.7 years

The open currency position is 23.4 of the market value of the investments.

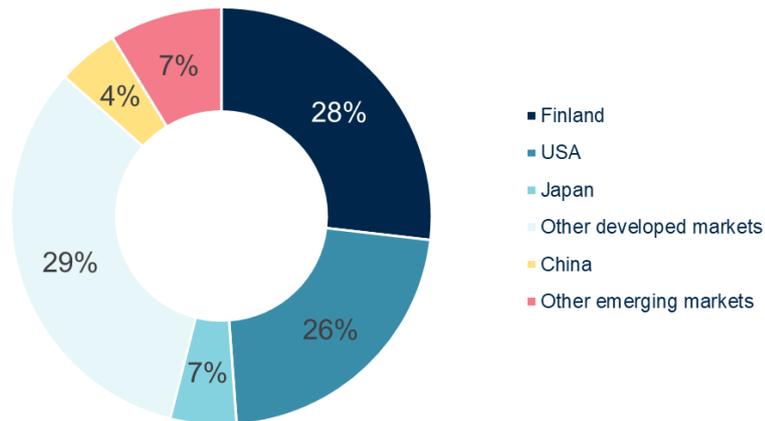

The total return percentage includes income, expenses and operating expenses not allocated to any investment types.

Market value of investment assets (EUR 50.5 billion) by asset class

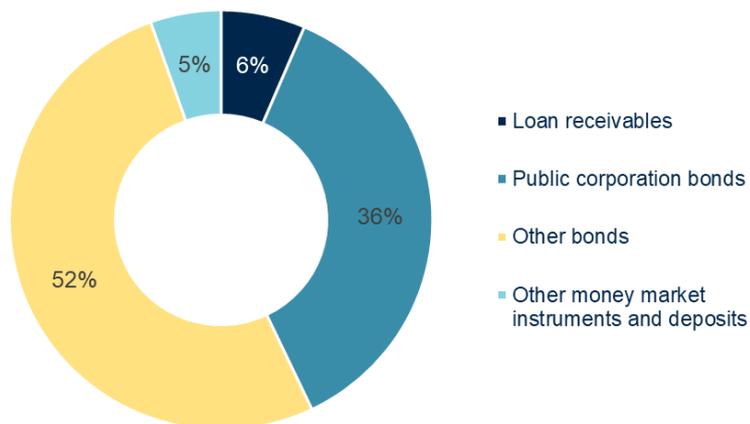

At EUR 23,736.1 (19,692.1) million, listed and non-listed equities and shares as well as private equity investments made up 47.0 (42.8) per cent of all investments, and their return at current value was 20.8 (–3.6) per cent. Listed equity investments amounted to EUR 18,485.3 (14,997.4) million. Their allocation by geographical area is presented below.

Listed equities and shares (EUR 18.5 billion) by area

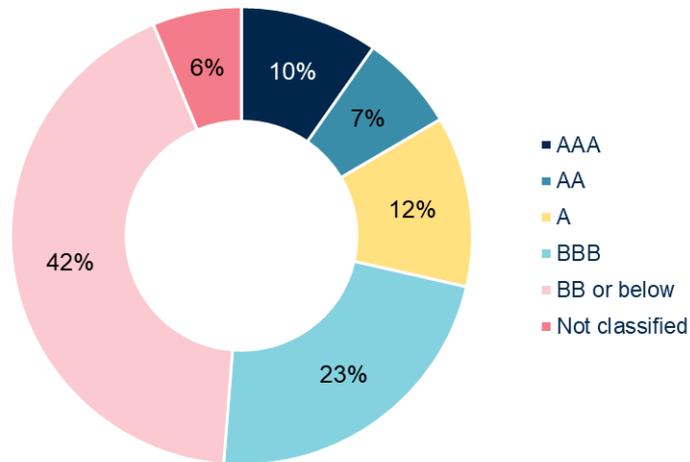

At EUR 17,014.6 (17,360.7) million, fixed income investments accounted for 33.7 (37.7) per cent of the company's investment assets, and their return was 4.7 (0.0) per cent. Fixed income investments consist of bonds, fixed income funds, other money market instruments and loan receivables. The allocation of fixed income investments by asset class is presented below.

Fixed income investments (EUR 17.0 billion) by asset class

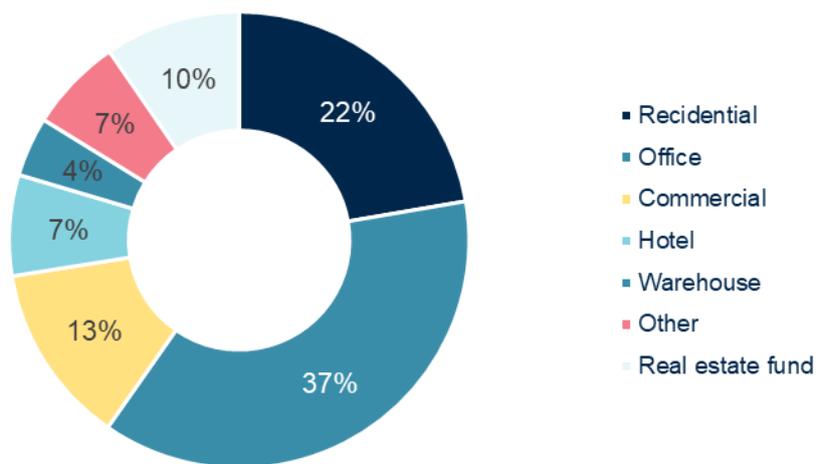

Of the fixed income investments, bonds amounted to EUR 14,998.9 (14,304.5) million. The allocation of bonds by credit rating is presented below.

Bonds by credit rating

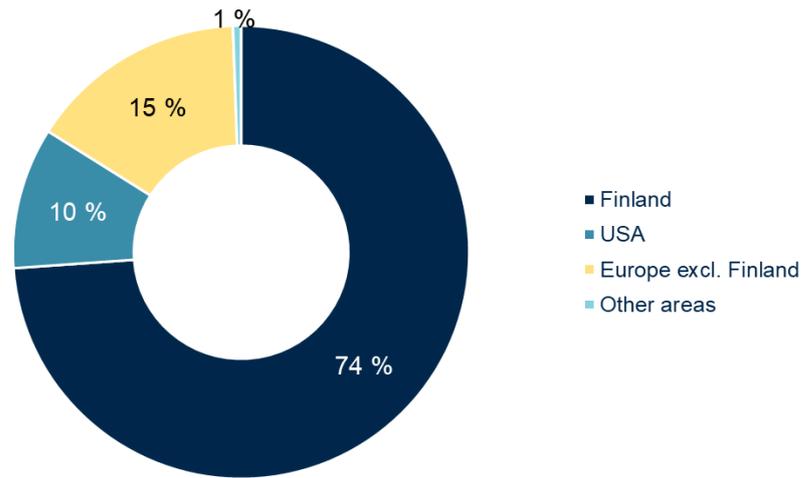

The share of real estate investments of total investments was 12.6 (13.2) per cent, or EUR 6,385.7 (6.096.4) million. The total return on the company's real estate investments was 8.4 (6.0) per cent. The allocation of real estate investments by property type is presented below.

Real estate investments (EUR 6.4 billion) by property type

Finnish investments accounted for 74 (74) per cent, or EUR 4,718.0 (4,505.3) million and foreign investments for 26 (26) per cent, or EUR 1,668.3 (531.0) million of Ilmarinen's real estate investments. The lease rate of Finnish real estate owned by Ilmarinen declined slightly and was 88.1 (90.5) per cent at year-end. The allocation of real estate investments by geographical area is presented below.

Real estate investments (EUR 6.4 billion) by area

In addition to the asset classes mentioned above, 6.7 (6.2) per cent of the market value of investment assets, or EUR 3,391.3 (2,874.8) million, consisted of commodity investments, investments in absolute return funds and other investments. The return on capital employed of these investments was -2.1 (-10.1) per cent.

At the end of 2019, Ilmarinen's Board of Directors approved the company's updated Responsible Investment Policy. The new policy puts even more emphasis on the environment, human rights and ownership in managing responsibility. However, the basic definition of responsibility remains essentially unchanged, in other words, investment activities are still guided by compliance with international norms, active ownership and integrating responsibility into portfolio management. Ilmarinen does not invest in companies that show indifference towards international norms. Investments are also not made in manufacturers of tobacco products or controversial weapons. Ilmarinen strives to limit its investments in carbon-intensive companies. Ilmarinen has set itself as a goal to achieve a carbon-neutral investment portfolio by the end of 2035.

If a company which Ilmarinen has invested in fails to meet the responsibility criteria, an engagement process can be initiated with the company instead of excluding the investment. At the end of 2019, Ilmarinen had 16 (12) on-going engagement processes, of which seven were related to the respect of human rights and labour rights. The problems concerning the respect of human rights were related to the quality of care services, product safety and the rights of indigenous peoples.

12 DEVELOPMENT, IT AND INFORMATION SECURITY

The national Incomes Register was introduced and the first invoices created based on information contained in the register were sent to customers in the beginning of January. The focus of IT system development during the year continued to be the implementation of the system integration needs arising from the merger between Ilmarinen and Etera. Integration work progressed as planned and the synergy benefits can be seen in the reduction of costs, which is expected to continue in 2020.

The key elements in Ilmarinen's strategy are customer-driven services that strongly rely on digitalisation, a good employee experience and cost-effective and reliable service production. The target state design for a customer-driven overall architecture that supports the strategic targets and the digital target state was started during the year. In the area of information security and data protection, the creation of operating models that meet the new requirements continued.

Ilmarinen's organisation was renewed during the year. In connection with the renewal, the development model was also updated to strongly support business- and customer-driven service development. The objective of the renewal is to streamline the business service development management and to enable direct customer involvement in service development.

The IT operations' organisation and responsibilities were also modified. The operations are geared towards an even greater cost-effectiveness while at the same time ensuring the availability and continuity of services, up-to-date, correctly licensed and secure environments, high-quality operations in systems' production change situations and improved IT supplier guidance.

13 RISK MANAGEMENT

The objective of Ilmarinen's risk management is to prevent the realisation of risks threatening the company's operations, minimise the financial and other damage caused by realised risks and to ensure the continuity of operations. Another objective is for the company to be able to utilise the opportunities offered by controlled risk-taking in business operations, especially in investment activities. The most essential goal is to secure the company's statutory operations and the rights of the insured, pensioners and policyholders in all situations.

The company has risk management system operating principles that cover its entire operations. The company's risk situation is regularly reported on to the Executive Group, the Board of Directors and the Board of Directors' Audit and Risk Management Committee for the company-level monitoring, assessment and development of risk management.

The company's risk management function, including monitoring of investment risks, and reporting to the Board of Directors fall under the responsibility of the Senior Vice President in charge of planning and monitoring the company's operations. Reporting on investment activities and risk monitoring are thus independent from the risk-taking function. The company's risk management function prepares, under the guidance of the Board of Directors, an assessment of the appropriateness of the risk management operations and, together with the operative management, the company's risk and solvency assessment.

Risk-taking in investment operations is steered by the investment strategy approved by the Board of Directors and the investment plan drawn up to implement it, as well as investment authorisations and other principles determined by the Board of Directors. Risk level and basic allocation change needs are monitored continuously. The risk management function produces scenario and stress tests for monitoring and assessment. In investment operations, risk monitoring and management are continuous.

Risk management is described in more detail in the notes to the financial statements.

14 PERSONNEL

An average of 689 (713) people worked for Ilmarinen Group in 2019. The average number of employees in the parent company Ilmarinen during the year was 651 (685), measured in person years. This figure includes 28 (56) part-time employees, whose work contribution has been adjusted to correspond with the average working hours of full-time employees. During the year, 16 (47) persons were on family leave or other unpaid leave. At the end of the year, the parent company Ilmarinen employed 644 (687) persons, of whom 616 (649) were permanent employees.

The organisation was renewed in 2019 to implement the strategy that was updated in 2019. In connection with the renewal, co-determination negotiations were conducted in spring 2019, and the new organisation entered into force on 1 July. As part of the reorganisation, 70 old jobs were discontinued, but at the same time, 60 new jobs were created and mostly filled from inside the company. The organisation was also flattened by removing at least one, and in places two, layers. The objective was to create a more agile and customer-driven company.

In 2019, Ilmarinen focussed on renewing the strategy and implementing it together with employees. Employees were widely involved in drawing up the strategy in spring. As part of the strategy work, a vision working group was set up from among the company's young employees to reflect on changes in the operating environment and the company's vision for the future.

As part of the strategy implementation, the company started creating a common operating culture. The company's supervisors gathered at a leadership event organised in the autumn to harmonise and develop leadership practices at Ilmarinen. In the autumn, a special emphasis was placed on identifying future competence needs, creating a foundation for a bold renewal of competence.

The transformational journey towards a common operating culture was nicknamed Il-maveivi (deke in English) by the personnel. The name depicts the employees' collective performance, where the goals of customer orientation, efficiency and attractiveness are scored by ideating ways to achieve them and get there together.

Concrete moves were also made within the premises to accommodate the new organisational structure and operating culture. The aim of the internal moves is to make employees' daily work smoother, improve the flow of information and increase co-operation within the organisation.

The personnel's energy levels were monitored through pulse surveys carried out every second month and an annual more extensive employee survey. Despite the changes and co-determination negotiations, the personnel's energy level was excellent throughout the year. The personnel's energy level was on average 4.0. The results were excellent and clearly outshone those of the peer group. The employee survey and pulse studies also measured employees' willingness to recommend Ilmarinen as an employer

through the employee Net Promoter Score (eNPS). Ilmarinen's eNPS at the end of the year was 23, on a scale of -100-100.

15 OPERATING EXPENSES

In 2019, Ilmarinen's total operating expenses were EUR 175.2 (194.6) million. The operating expenses in the comparison year 2018 were burdened by EUR 15.3 million in expenses from the write-downs of duplicative systems.

The company's loading profit improved significantly. Insurance contribution loading income was EUR 184.7 (178.7) million and the expenses covered by it were EUR 130.2 (148.8) million. The ratio of the above-mentioned operating expenses to the expense loading components available for them improved to 70.5 (83.2) per cent. The loading profit improved by EUR 24.6 million and was EUR 54.5 (29.9) million.

The statutory charges, EUR 12.0 (11.7) million, are financed through a separate part of the insurance contribution allocated to statutory charges. These charges are the share of the costs of the Finnish Centre for Pensions, the supervision charge of the Financial Supervisory Authority and the judicial administration charge.

Operating expenses for investment activities were EUR 26.5 (28.4) million, or 0.05 (0.06) per cent of the total investment amount. They are financed using the return on investments. The portion of the costs arising from activities for maintaining well-being at work and work ability, financed from the administrative cost component of the disability risk contained in the insurance contribution, was EUR 6.4 (5.7) million.

16 NON-FINANCIAL STATEMENT

Responsibility is one of Ilmarinen’s values and an integral part of all activities. Ilmarinen’s statutory basic task means that the company has a considerable responsibility in society: in 2019, the company was responsible for the pension security of approximately 1.2 million people. Ilmarinen invests the pension assets of current and future pensioners profitably and sustainably. These tasks call for responsibility from each and every employee.

Ilmarinen’s key sustainability targets are monitored using Key Performance Indicators (KPI). The sustainability KPIs are essentially based on the metrics and targets that are generally used for measuring Ilmarinen’s business. The sustainability KPIs are published on Ilmarinen’s [website](#).

The results are disclosed once a year in the Sustainability Report, which can be found on the [website](#). The report outlines sustainability targets and their outcomes in areas that are central to our operations. The sustainability reporting follows the GRI Standards framework of the Global Reporting Initiative (GRI). The report for 2019 will be released in March 2020.

In 2019, Ilmarinen compiled the non-financial targets and principles concerning investment operations into a Responsible Investment Policy document. The policy and its updates are approved by Ilmarinen's Board of Directors. The Responsible Investment Policy takes into account the investments' impacts on the environment and human rights as well as corporate governance issues. In addition, Ilmarinen published for the first time practical guidelines that describe in more detail the practices for implementing the Responsible Investment Policy.

Environmental issues

The key environmental impacts of Ilmarinen's operations are indirect. They are primarily linked to the use of investment assets on a global scale. Ilmarinen monitors the environmental impacts of, for example, security and real estate investments. Taking responsibility into account is part of investment risk management. The environmental risks of investees can materialise as financial losses and a loss of reputation.

The goal of Ilmarinen's Climate Policy is for investments to be in line with the goals of the Paris climate agreement. This means not only taking into account carbon risks, but also recognising that climate change mitigation opens up new business opportunities for companies. The new opportunities pertain to the increased demand for innovations that promote energy efficiency and cleantech solutions.

The Climate Policy 2016 set as a goal to increase the share of investments in companies producing sustainable solutions to 12 per cent of listed investments. Sustainable solutions include business related to energy efficiency, nutrition, prevention of contagious diseases, water supply and education, among other things. Investments in sustainable solutions must meet the same financial requirements as all other investments. In practice, this goal has proven problematic. For example, it has been challenging to determine the criteria based on which a business can be considered to solve sustainable development challenges. At the end of 2019, the goal had been reached in 9.2 per cent of listed investments.

Ilmarinen has monitored the carbon footprint of its listed investments since 2015 in a bid to reduce it. In December, Ilmarinen's Board of Directors approved the goal of carbon neutrality in investment operations by 2035. At the end of 2019, the carbon intensity of the direct listed equity portfolio was 240 (265) tonnes of carbon dioxide equivalents per million euros of net sales. This was on a par with the benchmark index. The carbon footprint of the direct listed corporate bond portfolio was 220 (316) tonnes of carbon dioxide equivalents per million euros of net sales.

Ilmarinen is one of Finland's largest real estate investors and a major developer. The company's direct environmental impacts are above all linked to the energy efficiency of properties and other climate and environmental impacts of the built environment. Ilmarinen invests in resource-efficient buildings that are healthy and safe for their users and located along good public transit connections. In new construction projects, the company reviews the opportunities available to use renewable energy, in particular geothermal heat and solar energy. In the construction phase, the opportunities of the circular economy and the entire life cycle of buildings are taken into account.

As a result of the on-going LEED Volume Programme v4, Ilmarinen has been granted new environmental ratings for existing properties. In 2019, in-use certification was granted to Mikonkatu 9, the Main Post Office building, the Grönqvist Building, Aleksanterinkatu 17, Aleksanterinkatu 30–34 and Aleksanterinkatu 44 in Helsinki, and

Keilaranta 19 in Espoo. All of these properties received the second-highest level of certification, i.e. Gold. The Graniittitalo building in Helsinki's Kamppi district was granted Silver, i.e. the third-highest level of certification.

In LEED in-use certification, the tenants' and building users' participation in the certification process plays a particularly important role. Location along good traffic connections and improving the property's energy efficiency are important factors. The energy savings targets planned and implemented by the users also have a great impact. Together with the tenants, we have been able to, for example, reduce the energy and water consumption of the buildings. The certifications are in force for five years.

Ilmarinen requires its new office properties to receive LEED Gold or similar environmental certification. Among the buildings completed in 2019, the Mall of Tripla opened in Helsinki's Pasila district reached the highest-level LEED Platinum construction phase certification. The use of solar power in shopping centres was expanded by introducing solar power in the Isokristiina shopping centre in Lappeenranta.

Ilmarinen annually calculates the carbon footprint resulting from its properties' energy consumption and the life cycle carbon footprint of its new construction projects. More detailed information on these is provided in the Sustainability Report.

Social and personnel issues

Earnings-related pension is a key component of Finnish social security. The company's statutory task is to take care of the pension insurance of its client companies' personnel and self-employed persons and pay out pensions.

Ilmarinen carries out its basic task with the highest quality and cost-effectiveness possible. In 2019, old-age pension decisions were issued within 25 (41) days on average.

Disability and retiring prematurely on disability pension is always a serious risk from the perspectives of employees, employers, pension insurance companies and the whole of society. As a responsible employment pension insurance company, Ilmarinen seeks to reduce its customer companies' personnel's disability risk by informing the client companies of the reasons of disability and through services aimed at lengthening careers. These include vocational rehabilitation and preventive, risk-based work ability management services. Co-operation with clients is always systematic, goal-oriented and measurable and the projects are targeted at jointly identified development areas to reduce disability risks.

In 2019, Ilmarinen organised 32 (54) work ability management coaching sessions throughout Finland.

One of Ilmarinen's key strategic goals is to be one of the best places to work in Finland. Personnel practices at Ilmarinen are open, employee rewards are fair and supportive, and the work environment and well-being at work are developed on a continuous basis.

As a responsible employer, Ilmarinen wishes to be an example of how work and the work community can support the energy level of individuals. The personnel's energy levels were monitored through pulse surveys carried out every second month and an annual more extensive workplace atmosphere survey. Despite organisational changes and the related co-determination negotiations, the personnel's energy level was excellent throughout the year. According to the full-year surveys, the personnel's energy level was on average 4.0. In the extensive employee survey, the overall score in 2019 was 3.9 (3.7) on a scale of 1–5. The result was excellent and clearly higher than that of the peer group.

In 2019, every Ilmarinen employee had the opportunity to participate in a FirstBeat measurement and an energy test and to receive personal feedback for both. In addition, Ilmarinen extensively supports work ability and well-being at work by, for example, supporting employees' sports activities, providing occupational health care that goes beyond the statutory level and offering a wide selection of coaching sessions to help employees foster their well-being, work ability and self-management. Ilmarinen additionally has a work community activation coach who supports joint exercise sessions during breaks and personal exercise targets.

Ilmarinen has an equality and non-discrimination plan which outlines the company's principles concerning the implementation of equal opportunities in terms of age, gender, family status, origin and nationality, language, religion, opinion, political activity, trade union activity, health and sexual orientation. Based on employee surveys, equality at Ilmarinen is at a good level.

Respecting human rights

Human rights issues appear on the company's agenda primarily through investment operations. Ilmarinen signed the UN's Principles for Responsible Investment (PRI) in 2006. Ilmarinen requires the companies it invests in to comply with, not only national legislation, but also the principles of the UN Global Compact and related international norms concerning human rights, labour rights, the environment and corruption.

At Ilmarinen, responsibility is an integral part of investment decisions. The company uses the rating systems of both external service providers and the sustainability ratings based on internal analysis, which portfolio managers monitor alongside financial key figures. The ratings cover close to 4,000 listed companies. Investing in companies with lower ratings always requires a separate analysis. An investee can also be blacklisted, which means that it cannot be invested in until the company's problems have been resolved. This helps to prevent any human rights risks and other responsibility risks in advance. In addition, ESG benchmark indices are used in stock selection, which means that the results of portfolio managers are compared to the indices, which include the sector's and geographical area's most sustainable companies. This encourages portfolio managers to place even greater emphasis on sustainable companies in their investment decisions.

An external service provider reviewed Ilmarinen's securities investments twice in 2019 and reported the detected norm violations and suspicions thereof, including human rights risks. In future, the objective is to obtain such information more frequently during the year. In the case of any human rights or other violations, the company's primary approach is to engage, either alone or together with other investors and partners, with the company to fix its operations. In 2019, 16 companies were subjected to an engagement process. Of the cases, seven were linked to respecting human rights and labour rights, involving, among other things, forced labour and poor working conditions, the rights of indigenous peoples and the limitation of the freedom of association. If engagement does not produce the desired outcome, the last resort is to exit from the investment.

Responsibility issues are discussed with the investees also outside actual engagement processes. Human rights issues that are regularly raised include, for example, the working conditions in a company's subcontractor chain.

Combating corruption and bribery

Ilmarinen's way of operating is determined in the company's Code of Conduct. The Code of Conduct is permanent in nature and is updated as needed. It is available on

Ilmarinen's [website](#). The Code of Conduct outlines, among other things, that Ilmarinen complies with good insurance practice, does not tolerate bribery, identifies and prevents conflicts of interest, does not abuse insider information, knows its clients and carries out sourcing in a responsible way. All of the company's employees complete the Code of Conduct online training.

The company has a full-time Compliance Officer, whose main task is to support the company's Board of Directors, management and business in the proper functioning and sufficiency of reliable governance and internal control, and in ensuring that regulations and business principles are followed. The Compliance Officer's responsibilities include updating the Code of Conduct. The company's Board of Directors approves the Code of Conduct and the more detailed supplementary principles and policies, such as the anti-bribery principles. The anti-bribery principles are applied in all of the company's business relations and operations. These public principles are available on Ilmarinen's [website](#). Just like the other Code of Conduct principles, the anti-bribery principles support a culture of doing what is right and they help manage compliance risks.

The employees have access to a Whistle Blowing channel for anonymously reporting suspected violations against the law, the Code of Conduct or any other Ilmarinen guidelines. No reports were made through the channel in 2019. Ilmarinen was not subject to any fines or non-monetary sanctions related to failure to comply with legislation or regulations in 2019.

The company monitors any suspicions of corruption and bribery-related violations in its investments, just as it monitors human rights and other norm violations. The primary strategy is to engage with companies to change their operations. In 2019, four engagement processes were underway that were linked to anti-corruption measures. The last resort is to exit from ownership in a company.

17 GOVERNANCE

Ilmarinen's Annual General Meeting was held on 28 March 2019. The Annual General Meeting approved the Financial Statements and Report on Operations, decided on changes to the Articles of Association and elected the auditor and the members of the Supervisory Board.

According to the new Articles of Association, the Supervisory Board has a maximum of 30 members, at least a third of whom are elected based on nominations by key central organisations representing employees and at least a sixth on nominations by key central organisations representing employers. The term of office of the members is three years, and a third of the members are due to resign annually.

The Annual General Meeting elected 30 members to the Supervisory Board. Matti Kähkönen, Chairman of the Board of Directors, Neste Oyj, continued as the Chairman of the Supervisory Board, and Salla Luomanmäki (first deputy), Executive Director, Akava Special Branches, and Ari Lehtoranta, President and CEO, Caverion Corporation, continued as the Deputy Chairmen.

The Supervisory Board convened twice in 2019.

The Supervisory Board's full list of members is available on Ilmarinen's [website](#).

The Annual General Meeting elected the auditing firm KPMG Oy Ab as the auditor, with Juha-Pekka Mylén, APA, as the principal auditor.

In 2019, Ilmarinen's Board of Directors had 14 members and four deputy members.

Mikko Helander, President and CEO of Kesko Corporation was the Chairman of the Board. Jarkko Eloranta, President of the Central Organization of the Finnish Trade Unions SAK and Jyri Häkämies, Director General of the Confederation of Finnish Industries EK acted as the Deputy Chairmen. The Board of Directors convened 11 times in 2019.

The composition of the Board of Directors 1 Jan–31 Dec 2019:

Chairman

Mikko Helander, President and CEO, Kesko Corporation

Deputy Chairmen

Jarkko Eloranta, President, Central Organization of Finnish Trade Unions SAK

Jyri Häkämies, Director General, Confederation of Finnish Industries EK

Members

Sture Fjäder, President, Confederation of Unions for Professional and Managerial Staff in Finland AKAVA, until 16 October 2019

Tero Kiviniemi, President and CEO, Destia Group Plc

Timo Kokkila, CEO, Pontos Oy

Hille Korhonen, President and CEO, Nokian Tyres Plc, until 5 March 2019

Pasi Laine, President and CEO, Valmet Oyj, as of 5 March 2019

Leena Laitinen, President and CEO, Alko Inc

Olli Lehtilä, Executive Vice President, OP Financial Group, Insurance Customers

Katarina Murto, Director of Negotiations, Finnish Confederation of Salaried Employees, STTK

Juho Nummela, President and CEO, Ponsse Plc

Seppo Parvi, Chief Financial Officer, Stora Enso Oyj

Kristian Pullola, Chief Financial Officer, Nokia Corporation

Kyösti Suokas, Vice Chairman, Finnish Construction Trade Union

Deputy members

Marja Aarnio-Isohanni, until 1 February 2019

Jouni Hakala, Director, Entrepreneurship and Business, Confederation of Finnish Industries EK

Annikka Lantto, Member of the Board, Antell Group

Samu Salo, Chairman, Union of Professional Engineers in Finland

Taina Tenhunen, Head of Human Resources and Knowledge Management, Hannes Snellman Asianajotoimisto Oy, as of 5 March 2019

In 2019, the Nomination and Compensation Committee was chaired by Mikko Helander and the members were Jarkko Eloranta, Jyri Häkämies and Tero Kiviniemi. The Nomination and Compensation Committee convened six times during the year.

In 2019, Kristian Pullola was Chairman of the Audit and Risk Management Committee and its members were Katarina Murto, Seppo Parvi and Jouni Hakala. The Audit and Risk Management Committee convened five times during the year.

Matti Kähkönen acted as the Chairman of the Election Committee and Matti Harjuniemi (until 7 November 2019) and Turja Lehtonen (as of 7 November 2019) as the Deputy Chairmen. The members were Markus Ainasoja, Sture Fjäder (until 16 October 2019), Mikko Helander (until 7 November 2019), Tero Kiviniemi, Pasi Laine (as of 7 November 2019), Ari Lehtoranta, Katarina Murto and Samu Salo (as of 7 November 2019). The Election Committee convened six times in 2019.

In its meeting on 7 November 2019, the Supervisory Board elected 12 members to the Board of Directors for the term beginning on 1 January 2020. According to the new Articles of Association, at least a third of the members of the Board of Directors are elected based on nominations by key central organisations representing employees and at least a sixth on nominations by key central organisations representing employers. The term of office of a Board member is three years, and a third of the members are due to resign annually. The Board of Directors has a maximum of 14 members and there are no deputy members.

The Board of Directors' full list of members is available on Ilmarinen's [website](#).

The attendance of the members of the Board of Directors and the Supervisory Board in meetings has been stated in the Report on Remuneration, which is available on Ilmarinen's [website](#).

18 GROUP

At the end of 2019, Ilmarinen Group comprised 196 (209) subsidiaries and 68 (71) participating interests, of which 30 (32) have been consolidated into the Group as associated companies. With the exception of three, the company's subsidiaries are real estate companies. The majority of the associated companies are also real estate companies or real estate management companies. Based on voting rights, Tietollmarinen belongs to Ilmarinen Group as Ilmarinen's ownership of Tietollmarinen's shares gives it control of 70 per cent of the votes, although Ilmarinen only owns 30 per cent of the share capital. The data on all of the subsidiaries and participating interests can be found in the notes to the financial statements.

19 EVENTS AFTER THE FINANCIAL YEAR

No significant events after the financial year.

20 FUTURE PROSPECTS

The global economy is expected to grow slightly faster in 2020 than in 2019, although the on-going trade war between the USA and China is fuelling uncertainty and weakening predictability. According to the IMF's forecast, the global economic growth rate will rise to 3.3 per cent in 2020 from 2.9 per cent in 2019. The increasing geopolitical uncertainty, growth of protectionism and the concerns around China's coronavirus epidemic are increasing the risks related to global economic growth.

Finland's economy is believed to continue growing, but at a slower pace than in 2019. The Ministry of Finance has projected that the economic growth in Finland will decrease from 1.6 per cent in the previous year to 1.0 per cent in 2020. However, the payroll continues to develop favourably. The positive trend in employment is expected to level out and the employment rate is expected to reach 73.6 per cent by 2022.

For the investment markets, the question is what companies' earnings power will be both in absolute terms and in relation to the underlying market expectations. The sustained decline in interest rates has channeled and will continue to channel investors' money into asset classes with weaker liquidity, raising valuation levels and lowering medium- and long-term return expectations, which, in turn, will make it increasingly difficult to achieve the set return targets. There is an assumption strongly built into the investment market that the interest rate level will remain low for quite some time. This assumption is supported by, for example, the central banks' recent rhetoric and measures. Thus, a higher inflation rate or a sudden surge in the interest rate level, or both together, would pose a challenge to the current price levels of many asset classes.

The key risks affecting Ilmarinen's operations and the earnings-related pension system are related to the development of employment and payroll, the ascending trend in disability prevalence, uncertainty in the investment market and the development of demographics and the birth rate, which has been exceptionally low in recent years.

FINANCIAL STATEMENTS PARENT COMPANY AND GROUP

2019

ACCOUNTING PRINCIPLES

Ilmarinen's financial statements are prepared in accordance with the Accounting Act, the Companies Act, the Insurance Companies Act and the Act on Employment Pension Insurance Companies. Ilmarinen's financial statements also comply with the act on the calculation of a pension provider's solvency limit and diversification of investments, the Ministry of Social Affairs and Health's decree on the financial statements of insurance companies and related consolidated financial statements, the accounting decree, the calculation principles and regulations approved by the Ministry of Social Affairs and Health, and with the regulations and guidelines of the Financial Supervisory Authority.

1 CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements cover the parent company and all subsidiaries in which the parent company, directly or indirectly, controls more than one-half of the voting rights. On the closing date, the parent company had 193 real estate companies and three other companies as subsidiaries. The companies consolidated into the Group are listed in the notes to the financial statement.

The consolidated financial statements are drawn up by combining the income statements, balance sheets and notes of the parent company with those of its subsidiaries and eliminating inter-company receivables and payables, revenues and expenses, profit distributions and equity ownerships. Subsidiaries acquired during the year are consolidated as of their acquisition date, and companies sold during the year are consolidated up to their date of sale. Minority interests are segregated from net income and from capital and reserves.

Inter-company equity ownership is eliminated based on the purchase method. The resulting consolidation goodwill is allocated to the assets of subsidiaries and expensed in accordance with their respective amortisation schedules. The portion of the consolidated goodwill that has not been allocated to assets will be expensed in 10 years and it has been entered under intangible rights in the balance sheet.

Impairments, related reversals and write-ups relating to real estate subsidiary shares have been reversed in the consolidated financial statements. In the consolidated balance sheet, the corresponding entries are allocated to the real estate holdings of subsidiaries at current value.

Material associated undertakings in which the Ilmarinen Group holds 20 per cent to 50 per cent of the voting rights, are included in the consolidated financial statements using the equity method. If a material associated undertaking is a joint venture, the undertaking's income statement and balance sheet items and notes are consolidated in accordance with the ownership share. The associated undertakings draw up their financial statements mainly using similar calculation bases to the parent company. If this information is not available on an associated undertaking and the associated undertaking draws up its financial statements using current values or IFRS principles in its financial statements, these values are used in the consolidation.

Housing and real estate companies are not consolidated as associated undertakings. The effect of these on consolidated net income and distributable reserves is not significant.

The consolidated income statement includes the Group's equity in the income of associated undertakings. In the consolidated balance sheet, the Group's share of an associated undertaking's cumulative income since acquisition is added to or deducted from the cost of the associated undertaking.

2 BOOK VALUE OF INVESTMENTS

2.1 REAL ESTATE INVESTMENTS

Buildings and structures are shown in the balance sheet at the lower of cost less scheduled depreciation or current value. The acquisition cost includes purchase-related variable costs. Shares in real estate entities and land and water areas are shown in the balance sheet at the lower of cost or current value. The values of some real estate investments have been written up in previous years. Scheduled depreciation is also deducted from the written-up portion of buildings, if recognised as income.

As of 2019, real estate funds are classified into real estate investments instead of shares and equity interests in accordance with a requirement change issued by the Financial Supervisory Authority. However, due to the immateriality of the change, the data for the financial statements' comparison year has not been changed.

2.2 SHARES AND PARTICIPATIONS

Other shares and equity interests classified as investment assets are shown in the balance sheet at the lower of cost or current value. The acquisition cost of shares and equity interests is based on asset class averages. Shares and equity interests regarded as fixed assets are reported in the balance sheet at cost less permanent value impairments. The cost basis of assets is calculated using the FIFO method.

2.3 MONEY MARKET INSTRUMENTS

Debt securities are reported at the lower of acquisition cost or current value by taking into account the changes in value due to the interest rate level. The difference between the nominal value and the acquisition cost is also recognised in acquisition cost as interest income or deducted from interest income over the remaining life of the instrument. The offsetting entry is an increase or a decrease in the cost of the instrument in question.

The acquisition cost of money market instruments is based on asset class averages.

Investments regarded as receivables are reported in the balance sheet at the lower of nominal value or current value.

Previously recorded impairments on investments are reversed through the income statement in cases where the current value of investments has risen.

2.4 DERIVATIVE CONTRACTS

Derivative contracts are recognised in the balance sheet at the lower of cost or current value. The acquisition cost of exchange-traded derivatives is based on asset class averages and the acquisition cost of OTC derivatives is calculated separately for each instrument. Any income/losses on closed and mature derivatives and on derivatives whose change in value has been paid or received during the maturity (e.g. futures), have been recognised in full.

Liabilities resulting from derivative contracts and securities given as collateral in derivatives trading and received securities not included in the balance sheet have been listed in the notes to the financial statements. In a transfer according to the Act on Financial Collateral Arrangements, the security received in cash is recognised as a liability and the cash provided as security is recognised as an asset.

Equity, fixed-income, credit risk, commodity, raw material and currency derivatives were used during the financial year. Some of the currency derivatives that constituted effective hedges at the balance sheet date are treated as risk-mitigating hedges for solvency calculation purposes. No hedge accounting has been applied in accounting.

2.5 BORROWED AND SHORT-SOLD SECURITIES

Information concerning the securities borrowed and the assets pledged as security for lending is presented in the notes to the financial statements. Short-sold securities are entered in the balance sheet as current liabilities in the amount of the higher of the sales price or the market price on the balance sheet date.

3 BOOK VALUE OF NON-INVESTMENT ASSETS

Intangible assets and equipment are reported in the balance sheet at cost less accumulated scheduled depreciation and amortisation. The acquisition cost includes purchase- and manufacturing-related variable costs.

Contribution receivables and other receivables are recognised in the balance sheet at the lower of nominal value or their likely realisable value.

4 PRECAUTIONARY PRINCIPLE WHEN RECORDING RETURNS

Private equity fund returns under the claw-back obligation are recorded during the term of the fund as reported by the fund company, because any liabilities can be covered with the fund's funds or uncalled investment commitments. When the fund is dissolved, the probable amount of possible liabilities is followed when recording the returns.

5 SCHEDULED DEPRECIATION

Depreciation follows a predefined depreciation schedule. Scheduled depreciation on buildings and structures is calculated on the cost of individual buildings and on recognised write-ups. Depreciation is based on the estimated useful life of buildings and the straight-line method. Depreciation periods for new buildings and structures are as follows:

Residential and office buildings	50 years
Hotels, commercial and industrial properties	40 years
Building components	10 years
Other assets	Business Taxation Act
Write-ups	same as buildings

A 20% salvage value has been fixed for some buildings and structures.

Scheduled amortisation on intangible assets and equipment has been calculated on the mean cost of specified groups of assets. Amortisation is based on the estimated useful life of assets and the straight-line method.

The amortisation periods are as follows:

Intangible rights	5–10 years
Vehicles and computer hardware	5 years
Other equipment	10 years

6 WRITE-UPS OF INVESTMENTS

The book values of land and water areas, buildings and securities can be written up. Write-ups of assets classified as investments are recognised in the income statement, and write-ups of items classified as fixed assets are entered in the revaluation reserve. If a write-up proves unfounded, a related loss is recognised in the income statement or the revaluation reserve is adjusted accordingly.

Write-ups on buildings are expensed in accordance with the applicable depreciation schedule.

7 CURRENT VALUE OF INVESTMENTS AND VALUATION DIFFERENCES

The notes to the financial statements itemise the remaining cost basis, book value and current value of investments and derivatives reported in the balance sheet. The difference between the first two values above consists of write-ups of investments. The difference between the last two values above indicates valuation differences that are unrecognised in the balance sheet. Receivables are valued at the lower of nominal value or net realisable value.

7.1 REAL ESTATE INVESTMENTS

The current value of real estate investments, as far as office premises are concerned, has been defined on a property-by-property basis, primarily utilising the income approach. The market approach, based on regional market price statistics, has also been used to supplement this approach. The current value of flats is primarily determined based on the market approach. Valuations also consider the purpose and condition, together with existing lease agreements and the current level of market rents. External real estate valuers and the company's own experts participate in the annual determination of the current value of real estate investments.

The value of investments in financial holding companies that own real estate and/or real estate shares is determined annually based on the net asset value on the balance sheet date indicated by the financial holding company.

In the absence of this measurement, the purchase price or the most recent valuation available is used. If the investment includes both a share in the company and a liability component, the change in valuation is primarily taken into account in the value of the company shares. The liability component is measured at nominal value, unless the company's financial position has weakened to the extent that it is insolvent or that the threat of insolvency is imminent. Real estate debt investments are basically valued at the lower of the value of the capital or net realisable value.

7.2 SHARES AND PARTICIPATIONS

The year's last bid quotation, or in the absence of this the last trading price, is used as the current value of listed shares.

Where the market value described above cannot be considered reliable in terms of the real market value, the average weighted by the closing prices of the three preceding transaction dates or another realisable value that is considered likely can be used.

The price based on the fund's net asset value (NAV) reported by the fund management company has been used as the current value of investment fund units.

If the valuation is not received automatically, the last available fund unit value reported by the management company is used. Listed funds are valued at the last purchase quote received from an external information service or, if unavailable, the last purchase price. Private equity fund units are valued at the management company's estimate of current value or, if unavailable, at acquisition cost.

The current value of other shares and equity interests is their remaining cost basis, likely realisable value, or net asset value.

The current value of direct unlisted equity investments is the purchase price.

However, if the purchase price is considered to materially deviate from the assumed market price, the valuation is based on separately defined internal principles.

7.3 MONEY MARKET INSTRUMENTS

The current value of debt securities is primarily based on market prices. If no market price is available or the investment's current value cannot be reliably determined, valuations by external parties are used or the current value is calculated using commonly accepted calculation models for market prices or the purchase price is used as the current value.

7.4 DERIVATIVE CONTRACTS

The current value of derivative financial instruments is generally the market price or the likely realisable value estimated by the counterparty. A more detailed description of the method of determining the current value of derivatives is presented in the notes to the financial statements in the section "Off-balance-sheet guarantee engagements and liabilities".

8 TECHNICAL PROVISIONS

The liability resulting from insurance contracts is reported in the balance sheet under technical provisions. It consists of provisions for unearned premiums and claims outstanding. The provision for unearned premiums relates to the company's future liability for pension contingencies, and the provision for claims outstanding relates to its liability for pensions already being paid out.

The technical provisions have been calculated using the calculation principles approved by the Ministry of Social Affairs and Health.

The provision for unearned premiums comprises a provision for future bonuses, which is counted in the solvency capital, and a provision for current bonuses, which includes the amount intended for distribution as contribution discounts to policyholders. The provision for unearned premiums also contains an equity linked buffer, which depends on the average return of the share investments of pension institutions. Twenty per cent of the provision for claims outstanding and provision for unearned premiums is tied to equity returns.

9 PROFIT FOR THE FINANCIAL YEAR

The calculation principles confirmed by the Ministry of Social Affairs and Health in advance define the earnings-related pension insurance company's profit for the financial year in the profit and loss account.

The calculation principles specify the allocation of book profit/loss between provisions for future and current bonuses and reported net income.

10 SOLVENCY CAPITAL

Legislation determines solvency requirements for earnings-related pension companies, the implementation of which is supervised by the Financial Supervisory Authority. The company prepares for insurance and investment risks through its solvency capital. Solvency capital refers to the difference between assets and liabilities at current value. Technical provisions do not, in this context, include provision for future bonuses that has accrued from investment income at book value. The solvency capital must meet the requirements laid down in the Act on Employment Pension Insurance Companies.

The solvency capital is presented in the notes to the financial statements.

11 TAXES AND DEFERRED TAX LIABILITIES AND ASSETS

Taxes for the financial year and previous financial years are recognised in the income statement on an accrual basis. Income tax on ordinary activities is tax at source on foreign investments.

Discretionary provisions and accelerated depreciation and amortisation are included in capital and reserves in the consolidated balance sheet, after deduction for minority interest; changes in these items are included in the reported consolidated net income for the financial year.

Ilmarinen does not include deferred tax liabilities and assets in the parent company's balance sheet or in the consolidated balance sheet, and does not deduct deferred tax liabilities from the company's solvency capital because the realisation of these liabilities and receivables cannot be considered likely in relation to the financial statements or consolidated financial statements of an insurance company engaged in the statutory earnings-based pension insurance business.

12 FOREIGN CURRENCY-DENOMINATED ITEMS

Transactions in foreign currencies have been recognised at the rate quoted on the day of the transaction. Receivables and liabilities denominated in foreign currencies that are not settled at the end of the financial year and the current values of investments are translated into euro using the reference exchange rates published by the European Central Bank on the balance sheet date or if the balance sheet date is not a day on which TARGET is open, the latest rates preceding this day.

Foreign exchange gains or losses arising during the financial year and at year-end are recognised as adjustments to related income and charges in the income statement, or as investment income and charges if such gains or losses pertain to financing transactions.

13 OPERATING EXPENSES AND DEPRECIATION BY FUNCTION

Operating expenses and depreciation and amortisation expenses on equipment and capitalised expenditures are reported as function-specific items in the income statement.

Expenses related to claims administration and the maintenance of employees' capacity for work are included in claims paid, and expenses related to investment management are treated as investment expenses. Expenses related to the origination and administration of policies and administrative overhead charges are presented as operating expenses. The statutory fees are included in administration costs.

Expenses incurred in other activities are defined as other expenses. Scheduled depreciation on buildings is reported as an investment expense.

14 STAFF PENSION ARRANGEMENTS

The pension insurance of personnel and members of the Board of Directors and the Supervisory Board is covered through TyEL insurance.

It has been supplemented with voluntary supplementary insurances. The management's pension arrangements are explained in the notes.

Pensions paid during the year under review have been paid on an accrual basis.

15 KEY FIGURES AND ANALYSES

All key figures and analyses concerning the company's financial performance are calculated and presented in accordance with regulations issued by the Financial Supervisory Authority regarding notes to the financial statements.

In the case of investment operations and solvency, key figures and analyses are given at current values.

The ratio of net income from investments at current value to capital employed is calculated separately for each type and also on the total investment portfolio, taking into account the weighting of cash flows on a daily or monthly basis.

The modified Dietz formula is used for calculation purposes, where the capital employed is calculated by taking the market value at the start of the period and adding to it each period's cash flows, weighted by the relative time remaining from the transaction date or middle of the transaction month to the end of the period.

Pension commitments for the benefit of the executive management		
<p>In addition to the statutory earnings-related pension, the President and CEO and his/her Deputies are covered by voluntary unit-linked defined-contribution supplementary pension insurance. The age entitling to old-age pension under supplementary pension insurance is 65 years, or the minimum retirement age according to the Employees Pensions Act, Section 11, Paragraph 2, if it is lower than the age mentioned above. The annual contribution for the supplementary pension insurance is 20 per cent of the annual earnings on which the statutory pension is based. The insurance contributions for defined-contribution supplementary pension in 2019 totalled EUR 252,860.83, of which the CEO's share was EUR 110,815.56 and the Deputies' share was EUR 55,382.98. Statutory earnings-related pension insurance contributions have been paid on the remuneration paid to the members of the Board of Directors and Supervisory Board.</p>

Profits on closed and mature derivatives have been recognised in full in profit and loss account.

20. SECURITIES AND FINANCIAL COMMITMENTS, PARENT COMPANY 31 DEC	2019	2018
Valuation principles		
<p>The fair values of listed derivatives are calculated using the price quoted on the stock exchange. Bilateral OTC derivatives are valued based on the counterparty's valuation if market conditions do not prevent the valuation at market value of the derivatives transactions in question. Bilateral OTC derivatives transactions are valued at the theoretical model price if market conditions prevent the valuation at market value of the transaction in question. The European Market Infrastructure Regulation (EMIR) and the related technical standards define in more detail when market conditions prevent valuation at market value. Non-centrally-cleared derivatives are valued at the value received from the central counterparty.</p> <p>Private equity fund returns under the claw-back obligation are recorded during the term of the fund as reported by the fund company, because any liabilities can be covered with the fund's funds or uncalled investment commitments. When recording the returns of a fund that is being dissolved, the probable amount of possible liabilities is followed applying the precautionary principle.</p>		
Amount of joint and several liability		
<p>The company belongs to a tax liability group represented by OP Cooperative. Group members are collectively responsible for the value-added tax payable by the Group.</p>		
VAT deduction refund liabilities	5,007,294.00	5,624,378.00
Rent liabilities (incl. leasing liabilities)		
Due in the next year	1,148,411.34	855,944.72
Due in subsequent years	946,321.70	1,038,113.75

RISK MANAGEMENT AT ILMARINEN

1 RISK MANAGEMENT AS A PART OF COMPANY MANAGEMENT AND INTERNAL CONTROL

Risk management is part of Ilmarinen's normal management and internal control. Risk management is made up of all the procedures and practices used to identify and assess risks threatening the company's operations and objectives as well as carry out the actions required by the assessment in order to manage risks.

Risk management is implemented through Ilmarinen's management and supervisory system and is based on the company's principles that enhance management and accountability. This makes risk management part of the company's operating practices, decision-making and processes, increasing the probability of achieving its goals and supporting the following of regulations.

Ilmarinen takes risks in its operations based on considered risk-return analysis in order to achieve, among other things, better results such as returns on investment operations securing pension payments. The purpose of risk management is to ensure that the risks that are taken are in proportion with Ilmarinen's risk capacity and risk appetite. If risks cannot be seen to bring the targeted benefits, they are avoided through financially reasonable methods.

The greater the potential risks involved in the processes or decisions to be made, the more specified are the operating procedures, decision-making authorisations and monitoring activities. The roles and responsibilities defined within the processes, the appropriate segregation of duties, access rights, the verification of the accuracy of information, back-up arrangements and the documentation of information systems and processes are essential means of risk management.

2 ORGANISATION OF RISK MANAGEMENT AND RESPONSIBILITIES

2.1 GENERAL FRAMEWORK FOR RISK MANAGEMENT AT ILMARINEN

Risk management at Ilmarinen is part of the management's field of responsibility and part of all of the organisation's processes, such as strategic planning and the change management processes. Risk management is also part of the company's operating principles, values and culture. Ilmarinen's risk management system's operating principles, supplemented by the investment plan in the area of investment operations, defines the framework for risk management.

2.2 THE COMPANY'S AND ITS BODIES' RESPONSIBILITIES IN RISK MANAGEMENT

The overall responsibility for ensuring that Ilmarinen has a functioning control and risk management system in place lies with the Board of Directors and the President and CEO. The Board of Directors reviews and approves Ilmarinen's risk management system's operating principles and investment plan annually. As part of strategic decision-making and risk management, the Board of Directors and the executive management annually perform the Own Risk and Solvency Assessment that evaluates the impact of the most significant risks on the company and the measures that are needed to manage these risks. The Board of Directors' Audit and Risk Management Committee assists the Board of Directors in supervision tasks that concern the company's financial reporting, risk management, internal control and the work of the internal audit and external auditors. The Supervisory Board is responsible for supervising the corporate governance actions undertaken by the company's Board of Directors

and President and CEO. Supervision of decision-making on pensions and investment operations is carried out on behalf of the Supervisory Board by supervisors appointed by the Supervisory Board from among its members.

2.3 RESPONSIBILITIES OF RISK MANAGEMENT IMPLEMENTATION AT ILMARINEN

The management and implementation of Ilmarinen's risk management is based on a model in which the responsibilities related to risk management are divided into three areas:

1. Ilmarinen's business divisions and support functions are responsible for their own risks and their management
2. Independent risk management functions prepare and develop risk management principles and support the smooth functioning of the divisions' risk management and ensure its sufficiency. Additionally, independent functions control the companies' risk situation and compliance with instructions and report on these regularly to the management and Board of Directors.
3. Internal audit assesses the sufficiency of internal control and risk management.

Ilmarinen's business divisions and support functions have the primary responsibility for the risks involved in their fields of responsibility and in the decisions they make as well as for their management. Thus the parties owning these risks are responsible for ensuring that procedures and instructions concerning operations enable profitable operations at an acceptable risk level. In practice, this means identifying and assessing the risks related to the company's objectives and operations and taking actions to manage these risks.

The company's independent risk management function is responsible for developing the company's risk management principles and framework. The risk management function supports the functions owning the risks in implementing effective risk management procedures and practices and assists them in risk reporting. The risk management function also monitors and assesses the company's risk situation and reports on it regularly to the company's management and the Board of Directors.

Ilmarinen has an independent compliance function that supports business operations in order to secure the functionality and sufficiency of reliable governance and internal control. The compliance activities are comprised of the assurance and monitoring of the legality of operations and compliance with external and internal rules related to the operations. The aim of the compliance activities is to ensure internal and external trust in the company's operations by strengthening the operating culture, both in terms of internal and external regulation and abiding by good market practices. The compliance function's task is to monitor and ensure that all of Ilmarinen's operations conform with legislation, guidelines and regulations given by authorities, good insurance practices, procedures and guidelines approved by the Board of Directors as well as guidelines concerning internal practices. The compliance function monitors and ensures the compliance with regulations by, among other things, evaluating internal processes and procedures as well as by providing the management and the business functions with necessary improvement suggestions.

Ilmarinen's internal audit supports the company's Board of Directors and President and CEO in their supervisory tasks. It is the task of the internal audit to assess the appropriateness, effectiveness, efficiency and adequacy of the risk management, internal control and management and administrative procedures in Ilmarinen's operations and processes and to make recommendations to improve them. In addition to the Internal Audit, external auditors evaluate the effectiveness of the internal control system and the adequacy of risk management. The external auditors also evaluate the effectiveness of internal auditing and the relevance of its results to their own work.

3 RISKS AND THEIR CLASSIFICATION

Risks that put Ilmarinen's successful operations in jeopardy can be any factors which

- adversely affect the company's possibilities to flawlessly perform its statutory task;
- adversely affect the company's possibilities to achieve its short- or long-term goals or
- otherwise threaten the continuity of the company's operations.

Risks can be either events or changes in the operating environment that hinder or interfere with the company's operations or they can materialise as untapped business opportunities that would be worth capturing.

Strategically important risks essentially threaten the achievement of the company's strategic goals and often, at the same time, the company's result or solvency. Strategically significant risks can be divided into business, investment, underwriting and operational risks.

Business risk refers to the risk of loss inherent in changes occurring in the competitive situation and in the industry as well as the failure of business decisions or their implementation.

Investment risks include market, credit and liquidity risks.

Underwriting risks are related to the adequacy of insurance contributions and technical provisions.

Operational risks refer to the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events.

The possible effects of the risks cannot always be measured explicitly in money, as they can also, if they materialise, indirectly affect Ilmarinen's reputation. The materialisation of a risk in a risk category can lead to a weakening of Ilmarinen's reputation among various stakeholder

groups and thus result in business losses. In the worst-case scenario, the conditions necessary for the company to operate independently could be weakened significantly.

4 STRATEGICALLY IMPORTANT RISKS

The most important strategic risks related to the company's operations are identified and assessed by the company's Executive Group. Responsible persons have been assigned from the Executive Group for each identified risk, and it is their duty to ensure the sufficiency of risk management means and the implementation of necessary action plans. Strategically important risks are included in the company's Own Risk and Solvency Assessment approved by the Board of Directors.

5 INSURANCE RISKS AND THEIR MANAGEMENT

5.1 INSURANCE CONTRIBUTIONS AND TECHNICAL PROVISIONS

Insurance risks are related to the adequacy of insurance contributions and technical provisions. The calculation of both quantities is determined by the company's calculation bases, which are confirmed by the Ministry of Social Affairs and Health (STM), based on the company's application. The aim of risk management in the insurance business is to ensure that the calculation bases meet the sustainability criteria required by law. This is the responsibility of the company's chief actuary.

Under the Employees Pensions Act (TyEL), the Ministry of Social Affairs and Health may not allow differences in the pension insurance terms and conditions neither in calculation bases which would obstruct the implementation of the act or the handling of business under the joint responsibility of pension institutions, unless it has a special reason for doing so. The law requires earnings-related pension institutions to co-operate to achieve this goal. As a consequence of the above, the bases for calculating insurance contributions and technical provisions are the same for all pension insurance companies, excluding certain exceptions.

Due to the partial funding of pension benefits, insurance contributions and technical provisions include insurance business under the company's own responsibility and business under the joint responsibility of pension institutions (pay-as-you-go business). The pension expenditure under joint responsibility is pooled between all pension thus it does not cause a risk for a single pension institution. The risk of insurance contributions and investment returns being sufficient to cover the pension expenditure under joint responsibility in the future is borne by the private-sector insurance payers, i.e. employers and employees together. The provision for pooled claims contained in the technical provision acts as a buffer for jointly managed insurance business. Pensions under the Self-employed Persons' Pension Act (YEL) are financed through the insurance contributions collected each year and the state's share. The financing follows the principles of the pay-as-you-go pool, which means that this does not result in a risk for individual pension institutions. Thus, only TyEL insurance under the company's own responsibility and related insurance risks are examined in the following.

TyEL business under the company's own responsibility consists of old-age and disability pension business. In addition, the company is subject to a risk of premium loss linked to unpaid insurance contributions. Key factors in managing insurance risks include taking into account the uncertainties linked to the expected pension incidence, compensation amounts and the duration of pensions. The most significant risks concern the uncertainty related to the length of life expectancy and the incidence of disability pensions.

The old-age pension business risk is the deviation of the actual mortality from the expected one. Part of the old-age pension is funded during the active period as the pension accrues. The amount of accrued pension liability depends on the expected mortality. When the actual

mortality deviates from the assumption, the funded pension expenditure turns into either profit or loss for the company. The mortality bases were last adjusted at the end of 2016. Costs resulting from a change in the mortality base are the joint responsibility of pension institutions, which means that company-specific risk mainly arises if the company's insurance portfolio deviates from the average. Etera Mutual Pension Insurance Company merged with Ilmarinen on 1 January 2018 and, at the same time, the terminated insurance portfolio under the Temporary Employees Pensions Act (LEL) transferred to the company. Due to the exceptional nature of this insurance portfolio, a company-specific mortality base concerning the LEL insurance portfolio was confirmed for the company.

The risks in the disability pension business are related to the incidence of disability pensions, the amount of the granted pensions and the termination of the valid disability pensions. Disability pensions are funded when the pension commences. The disability pension component of the insurance contribution is confirmed annually and its adequacy is regularly monitored. The disability pension business involves a company-specific risk of the company's disability pension expenditure deviating from the assumption used in the calculation bases. This risk is increased by the long delay between the onset of disability and the beginning of the pension. That is why Ilmarinen regularly monitors the development of the disability pension business and the incidence of pensions.

In terms of premium losses, the risk is related to a higher than expected amount of unpaid contributions. The premium loss component of the insurance contribution has been dimensioned to correspond to the insurance portfolio structure, and it takes into account the larger premium loss risk of smaller employers.

5.2 RISKS INHERENT IN THE COMPANY'S INSURANCE PORTFOLIO STRUCTURE

When preparing the calculation bases, the insurance contribution and technical provisions are dimensioned according to the companies' average insurance portfolio. In addition, TyEL contains a provision according to which, in the case that technical provision calculation bases prove to be insufficient for all pension institutions, the increase in technical provisions resulting from changing the calculation bases shall be covered in such a way that it does not entail a risk for an individual pension institution. However, the calculation base can be insufficient also for an individual pension institution. Thus, each pension institution carries the risk that its insurance portfolio structure deviates from the industry average in an adverse direction.

The old-age pension business involves the risk that the company's insurance portfolio's average life span and thus the pension span are longer than those of other companies. At Ilmarinen, the differences between sectors have largely been neutralised through a separate LEL mortality base. Employment pension insurance companies mainly operate on a national level, which means that life expectancies in different areas are equalised. Random fluctuations in the old-age pension business are very small on the insurance portfolio level.

There may be systematic company-specific differences in disability pension incidence when, for example, the company's operations are limited to a narrow geographical area or if the sector distribution of the insurance portfolio deviates from the average.

It is against the law to use risk selection as a means of risk management in earnings-related pension insurance business. An earnings-related pension insurance company must therefore grant insurance to a company with an obligation to take out insurance. This has an impact on the management of the premium loss risk in particular.

If the insurance result of an individual pension insurance company is systematically lower than that of the others, the difference reduces the company's solvency capital and client bonuses compared to other companies. Companies' insurance portfolios somewhat differ from one another in terms of, for example, the insured's age class distribution and the policyholders' size class and sector distributions. Ilmarinen's insurance risk primarily stems from the fact that the

insurance portfolio under Ilmarinen's own responsibility deviates from the average. The separate LEL mortality base confirmed for Ilmarinen reduces the risk.

Insurance risks are regularly monitored by assessing the development of the insurance result during the year. In addition, various technical analyses and statistics are produced on Ilmarinen's insurance portfolio to obtain more detailed information about its changes and risks inherent in the insurance business, and to look into any deviations.

5.3 PROVISION FOR FUTURE AND CURRENT BONUSES

The technical provisions also include a provision for future bonuses, a provision for current bonuses and an equity linked provision for future and current bonuses.

The provision for future bonuses is accrued or reduced annually in the financial statements by the book result of investment operations, which is obtained by deducting the return requirement on technical provisions from the net accounting income. In addition, since 2017, the underwriting business result has accrued or reduced the provision for future bonuses. The provision for future bonuses is included in the solvency capital. The provision for current bonuses includes the client bonuses that will be distributed in the following year as discounts on the insurance contribution.

Part of the share price risk of pension institutions is thus carried by the entire earnings-related pension system. This has been done by linking part of the return requirement on technical provisions to the development of equity returns. That way, the technical provisions also partly serve as a buffer against fluctuations in the investment result. The equity linked portion is 20 per cent.

The linking is done through a specific technical provision item, the equity linked buffer, the annual change of which corresponds to the development of equity returns. This component of technical provisions develops in the same way in all pension institutions and can increase their technical provisions by a maximum of one per cent or reduce them by a maximum of 20 per cent.

5.4 RETURN REQUIREMENT ON TECHNICAL PROVISIONS

In the long term, technical provisions must deliver at least a return which equals the weighted average of the technical interest rate specified in the TyEL calculation bases and the return on equity investments, the latter having a 20 per cent weight. If the long-term return on investments is lower than average, the company's risk-taking capacity decreases and achieving the return requirement becomes difficult.

The technical rate of interest, which portrays the long-term return on investments, is based on the pension institutions' average solvency ratio. The return according to the supplementary factor, i.e. the difference between the technical rate of interest and three-per-cent discount rate, is used to increase the funded old-age pensions. Similarly, if the amount of equity linked buffer exceeds the maximum limit, one per cent of the technical provisions used in the calculation, the exceeding amount is used to increase funded old-age pensions.

5.5 STRUCTURE OF TECHNICAL PROVISIONS

The structure of Ilmarinen's technical provisions in the financial statements was as follows:

	Financial statements 31 December 2019		Financial statements 31 December 2018	
	EUR million	%	EUR million	%
Future pension liability	19,660	47	19,043	47
Current pension liability	18,939	45	18,399	45
Provision for future bonuses	1,575	4	3,044	7
Provision for current bonuses	163	0	119	0
Equity linked buffer	1,538	4	-263	-1
Total TyEL insurance	41,875	99	40,342	99
Other than TyEL insurance technical provisions	275	1	284	1
Total technical provisions	42,150	100	40,626	100

6 INVESTMENT RISKS AND THEIR MANAGEMENT

6.1 OBJECTIVES OF INVESTMENT OPERATIONS

Ilmarinen's risk capacity is determined based on the company's solvency situation. A key objective of investment operations is to fully utilize the company's risk capacity in order to maximize long-term returns without compromising compliance with regulatory solvency requirements in the short term.

Ilmarinen's investment strategy is a balancing act between several simultaneous goals. Its objectives are, on the one hand, to achieve a maximum long-term return within the requirements of technical provisions and regulatory constraints, and on the other hand, to improve its solvency in the medium term compared to competitors, while at the same time ensuring that the solvency limit is not breached.

The strategic allocation is based on a strategy that best meets Ilmarinen's goals and simultaneously fulfils the company's solvency requirements with enough certainty. The company's Board of Directors reviews the strategic allocation at least yearly.

6.2 SOLVENCY MANAGEMENT'S LINK TO INVESTMENT OPERATIONS AND RISK MANAGEMENT

The objective of solvency risk management is to ensure that Ilmarinen is able to implement its investment strategy while taking into account the uncertainty related to assumptions and set goals. That is why the investment portfolio's risk level is continually compared to Ilmarinen's risk capacity. If required, action is taken to prevent the company from ending up in a situation in which it would be forced to give up its long-term investment strategy in order to ensure its short-term solvency.

The investment portfolio's risk level is assessed at Ilmarinen both through short-term risk calculations as well as complementary stress tests and longer-term scenario models.

The company's solvency capital, which is the difference between the company's assets and liabilities, serves as a buffer against investment risks. The most important items in the solvency capital are the company's capital and reserves, provision for future bonuses and the valuation gains/losses on investments. If investment income exceeds the interest to be credited on technical provisions, the difference is added to the solvency capital. In the opposite scenario, the solvency capital is reduced.

The minimum capital requirement provided for by law, the solvency limit, depends on the extent of risk-taking in the company's investment operations. Riskier investments require greater solvency capital. The basic quantity of the solvency requirements is the solvency capital's solvency limit. The theoretical base for its dimensioning has been determined in such a way that, within one year, the likelihood of a loss higher than the solvency limit taking place in the company's investment and insurance risks is maximum 3 per cent. However, the solvency limit is always at least 5 per cent of the total amount of investments calculated at current value.

The risks linked to the company's operations are taken into account in calculating the solvency limit in accordance with the risk classes defined in the Solvency Act. All material risks defined in the regulations affecting the investment are taken into account for each investment. When calculating the solvency limit, a risk value and expected return are calculated for each risk class and the risk resulting from the concentration of investments is taken into account. Additionally, the calculation takes into account the dependencies between risk classes. The minimum capital requirement is one third of the solvency limit. Risk taking in investment operations is limited by law and by the internally set investment authorizations, approved by the board of directors, that manage risk taking and ensure sufficient investment portfolio diversification and liquidity.

Ilmarinen's solvency capital at the end of 2019 was EUR 10,792 million and its solvency limit was EUR 6,615 million. The solvency position, i.e. ratio of solvency capital to the solvency limit was thus 1.63. Ilmarinen's solvency ratio, i.e. the ratio of pension assets to the technical provisions stood at 126.6 per cent. The solvency ratio describes the company's risk-bearing capacity and the solvency position portrays the risk taken by the company in relation to its risk capacity.

6.3 MATERIAL RISKS IN INVESTMENT OPERATIONS

Market risk

Market risk is defined as fluctuations in the value of an investments. The market risks directed at Ilmarinen's investment assets are mainly related to equity, interest-rate, interest-rate-differential, real estate, currency, commodity and volatility. The most significant of these is equity market risk.

Credit risk

Credit risk is realised in situations where the counterparty is not able to meet its commitments. Credit risks related to Ilmarinen's operations result from direct lending and counterparty risks from bonds and OTC derivatives.

Liquidity risk

Liquidity risk means the risk that the investments cannot be sold at the right time to finance operations or avoid investment losses. Due to the long and predictable liabilities of pension providers, even a large part of the investments can be invested in more illiquid investments, if required.

Concentration risk

Concentration risk means an increase in the portfolio's total risks due to insufficient diversification.

Model risk

Model risk refers to the simplifications concerning the methods and models used and the uncertainty related to made assumptions, which reduce the reliability of the used methods and, in the worst-case scenario, lead to inferior decision-making.

6.4 RISK ASSESSMENT AND RISK MANAGEMENT METHODS

Market risks are managed through predefined investment authorizations. Ilmarinen's Board of Directors confirms the authorizations, restricting the investment operations, annually in conjunction with the approval of the investment plan. The management, within the framework of the investment authorizations, may deviate from the asset class weightings specified in the strategic allocation.

The authorizations are implemented by setting limits on maximum losses occurring with a certain likelihood (Value at Risk, VaR) or through maximum permitted allocations for individual risk concentrations.

The table below illustrates the effects of market developments on Ilmarinen's solvency: Other asset classes are expected to move in accordance with the historical correlations between them and shares, assuming a 10-per-cent decline in share prices. In addition, a situation in which the current values of real estate declines by 10 per cent and, at the same time, the current values of other asset classes remains unchanged is included.

	Change in share prices -10%	Current value of real estate -10%
Effect		
- on solvency capital (EUR million)	-1,794.7	-626.9
- on solvency position	-0.14	-0.09
- on market value	-5.4%	-1,2%
- on solvency ratio	-3.9% points	-1.7% points

If the investments on 31 December 2019 are taken as the starting point, there was a 2.5 per cent likelihood that the value of the investments could drop by at least EUR 2,688 million within one month. This Value at Risk calculation equals 5.3 per cent of the investments and 24.9 per cent of the solvency capital at year end. If such a risk had actually materialised, the solvency ratio would have declined to 122.7 per cent.

The primary instruments of managing credit risks in direct lending are fundamental company analyses and proportional lending aligned with the company's predicted future solvency. Credit risk is further managed through collateral arrangements.

Counterparty risks relating to bonds are managed through analyses of the issuers' creditworthiness and by ensuring proper diversification across both across credit ratings as well as on issuer level.

The counterparty risk of OTC derivatives is managed through collateral. Counterparty risks relating to non-standard derivatives are also managed by using international standard agreements approved by the International Swaps and Derivatives Association (ISDA) with all counterparties.

Liquidity risks in relation to Ilmarinen's liabilities, are easily managed, as pension expenditure can be forecast rather reliably and most of the assets are invested in liquid securities. Short-term liquidity risks, based on the poor convertibility of investment instruments, are managed by sizing positions proportionally to their average daily turnover.

Ilmarinen's investment portfolio is broadly diversified. The largest single issuer risk weighting is in Kojamo Oyj (EUR 495 million) with a weight of 1.0%.

The objective of Ilmarinen's risk management is to identify and analyse new emerging risk factors in advance and to take into account the limited perspective of the risk calculations carried out based on historical time series data. For these reasons, risk analyses are supplemented by stress tests and scenario analyses on a continuous basis in order to support the investment decision-making.

Ilmarinen has in place detailed principles approved annually by the Board of Directors concerning the use of derivatives. As a general rule, the market risk related to derivatives is converted into so-called delta-adjusted risk positions, which expresses the real underlying risk related to derivatives. In monitoring set limits, the aim is generally to take into account the combined risk position of derivatives and cash instruments.

6.5 SUPERVISING AND REPORTING OF INVESTMENT OPERATIONS

The performance of the investment operations, the various risky positions within the investment portfolio and Ilmarinen's solvency situation are continually monitored by the independent risk management function. The function reports on possible investment authorization breaches and investment operations performance on a monthly basis to the Board of Directors. If required, the risk management function presents a proposal concerning a change in the current basic allocation or investment authorizations.

6.6 INVESTMENT PORTFOLIO ALLOCATION BY ASSET CLASS

The breakdown of Ilmarinen's investments into main asset classes on 31 December 2019 and the return from these investments are presented in the notes to the accounts under "Key figures and analyses". The following table follows the method agreed together with the pension institutions on describing investment returns and risks.

2019	Basic breakdown		Risk breakdown		Return	Volati-
	EUR million	%	EUR million	%	%	lity %
Fixed-income investments	17,015	33.7	12,917	25.6	4.7	
Loan receivables	1,097	2.2	1,097	2.2	2.5	
Bonds	14,999	29.7	9,070	18.0	5.0	2.3
- Public corporation bonds	6,209	12.3	5,354	10.6	7.9	
- Other bonds	8,790	17.4	3,717	7.4	3.6	
Other money market instruments and deposits	919	1.8	2,750	5.4	2.6	
Equities and shares	23,736	47.0	23,765	47.0	20.8	
Listed equities and shares	18,485	36.6	18,514	36.6	22.5	11.4
Private equity investments	4,306	8.5	4,306	8.5	15.6	
Non-listed equities and shares	945	1.9	945	1.9	13.2	
Real estate investments	6,386	12.6	6,403	12.7	8.4	
Direct real estate investments	5,778	11.4	5,779	11.4	8.8	
Real estate funds and joint investments	608	1.2	625	1.2	4.4	
Other	3,391	6.7	4,907	9.7	-2.1	
Hedge fund investments	2,482	4.9	2,482	4.9	5.3	3.6
Commodity investments	20	0.0	33	0.1	-	
Other investments	889	1.8	2,391	4.7	-19.6	
Investments total	50,528	100.0	47,992	95.0	11.8	4.1
Effect of derivatives			2,536	5.0		
Total investment at current value	50,528	100.0	50,528	100.0		

The modified duration of bonds is 1.7 years.

The open currency position is 23.4% of the market value of the investments.

The total return percentage includes income, expenses and operating expenses not allocated to any investment types.

The tables below present the breakdown of listed equities by geographical area, the breakdown of bond investments by credit rating and the breakdown of real estate investments by investment class.

	Breakdown of investments in listed equities and shares			Breakdown of credit ratings of bonds including fixed-income funds	
	Share, %			Share, %	
	2019	2018		2019	2018
Finland	28	27	AAA	10	14
USA	26	22	AA	7	7
Japan	7	5	A	12	11
Other developed markets	29	33	BBB	23	22
China	4	5	BBB or worse	43	34
Emerging markets excl. China	7	9	Not rated	6	12

Structure of real estate investments	Share, %	
	2019	2018
Residential premises	22	22
Office premises	37	38
Commercial premises	13	12
Hotels	7	7
Warehouse premises	4	4
Other	7	7
Real estate funds	10	10

The occupancy rate of the real estate portfolio (locations under renovation excluded) was 90.8 per cent (93.3%).

7 OPERATIONAL RISKS AND THEIR MANAGEMENT

Operational risks are related to all operations and it is not possible to avoid them fully. The aim is to mitigate these risks using financially viable methods. Operational risks also include legal risks and compliance risks related to compliance with regulations and the Code of Conduct.

The majority of operational risks are managed as part of the business units' normal internal control and management of operations. This is under the responsibility of the head of each unit. The objective is for the operations of each unit to be carefully performed, maintain a high quality, and be economical and efficient. The management of significant operational risks has been taken care of, for example, by ensuring the personnel's expertise and employing a range of means relating to information technology and operating practices, such as backup systems and backup communication connections, documentation of processes as well as the use of benchmark data and monitoring procedures.

Risk and control assessments are the core of operational risk management. This includes both identifying and assessing the risks as well as ensuring the sufficiency of control and management measures. Ilmarinen's functions identify the operational risks related to their operations once a year using an established model, in connection with business planning and additionally in connection with major changes in their operations. Process and IT risks form a key risk area for Ilmarinen's operations. The most serious operational risks in terms of the company's basic task are errors and disturbances that could prevent the correct calculation or timely payment of pensions.

According to the risk management system's operating principles approved by Ilmarinen's Board of Directors, all of Ilmarinen's business divisions and support functions must report any risk events related to their operations, i.e. realised operational risks and near-misses. Risk events are recorded at Ilmarinen to the operational risk reporting and monitoring system by a standard model. This enables, among other things, the monitoring of up-to-date operational risk information and utilisation of the data in planning of operations and decision-making.

Ilmarinen has a statutory obligation to prepare, which requires the company to prepare for major incidents and contingencies. The purpose of preparing is to ensure the continuity of company's operations in different disruption situations and circumstances and to limit the resulting negative impacts. Ilmarinen has drawn up plans for ensuring the continuity of operations and for steering operations in disturbances, and they are monitored and maintained annually to keep them up to date.

Pension commitments for the benefit of the executive management		
<p>In addition to the statutory earnings-related pension, the President and CEO and his/her Deputies are covered by voluntary unit-linked defined-contribution supplementary pension insurance. The age entitling to old-age pension under supplementary pension insurance is 65 years, or the minimum retirement age according to the Employees Pensions Act, Section 11, Paragraph 2, if it is lower than the age mentioned above. The annual contribution for the supplementary pension insurance is 20 per cent of the annual earnings on which the statutory pension is based. The insurance contributions for defined-contribution supplementary pension in 2019 totalled EUR 252,860.83, of which the CEO's share was EUR 110,815.56 and the Deputies' share was EUR 55,382.98. Statutory earnings-related pension insurance contributions have been paid on the remuneration paid to the members of the Board of Directors and Supervisory Board.</p>

20. SECURITIES AND FINANCIAL COMMITMENTS, GROUP 31 DEC	2019	2018
Valuation principles		
<p>The fair values of listed derivatives are calculated using the price quoted on the stock exchange. Bilateral OTC derivatives are valued based on the counterparty's valuation if market conditions do not prevent the valuation at market value of the derivatives transactions in question. Bilateral OTC derivatives transactions are valued at the theoretical model price if market conditions prevent the valuation at market value of the transaction in question. The European Market Infrastructure Regulation (EMIR) and the related technical standards define in more detail when market conditions prevent valuation at market value. Non-centrally-cleared derivatives are valued at the value received from the central counterparty.</p> <p>Private equity fund returns under the claw-back obligation are recorded during the term of the fund as reported by the fund company, because any liabilities can be covered with the fund's funds or uncalled investment commitments. When recording the returns of a fund that is being dissolved, the probable amount of possible liabilities is followed applying the precautionary principle</p>		
Amount of joint and several liability		
<p>The company belongs to a tax liability group represented by OP Cooperative. Group members are collectively responsible for the value-added tax payable by the Group.</p>		
VAT deduction refund liabilities	34,785,107.29	42,631,672.53
Rent liabilities (incl. leasing liabilities)		
Due in the next year	1,378,360.51	1,019,221.83
Due in subsequent years	1,006,913.14	10,786,261.86
Other financial commitments	1,720,000.00	1,047,000.00

PROPOSAL OF THE BOARD OF DIRECTORS FOR THE DISPOSAL OF PROFIT

The parent company's distributable capital and reserves in the financial statements on 31 December 2019 amount to EUR 154,827,013.90, of which the profit for the financial year is EUR 8,920,049.77.

The Board of Directors proposes that a maximum of EUR 50,000.00 be reserved for use by the Board of Directors as donations for purposes of general interest, or similar purposes, and authorises the Board of Directors to decide on the recipients of the donations, their purpose and other conditions for donations. The authorisation will be in force until the 2021 Annual General Meeting and any donation funds that remain unused at the end of the authorisation shall be transferred to the contingency fund.

In addition, the Board of Directors proposes that the remainder of the profit, i.e. EUR 8,870,049.77 be transferred to the contingency fund.
